PONDEROSA PEACH

*The Largest and Most Profitable Variety to Grow.
This Peach is Fully Guaranteed*

CATALOG FOR SPRING 1924

Bradley Brothers, Makanda, Ill.

The New Perfection Everbear- ing

This variety is second only to Champion, and when the name of Perfection was given it, we consider the name was well chosen. See our special collection offer on page 27.

New Perfection.

Champion Everbearing

We consider this berry really the Champion. The fruit is the largest, most perfect shaped and the best flavored berry we have ever grown. What could give you more profit and pleasure than having fresh, ripe Strawberries from early June to freezing weather? See our collection of everbearing berries on page 27.

*The
Prize Winning
Everbearer
CHAMPION*

A Word to Our Customers

The fact that our business has been growing from year to year, and that we have customers who have been buying all their trees and plants from us for over thirty years, should be proof of our honesty and ability to please.

It would indeed be a great pleasure to meet every one of our customers face to face and extend to each our right hand, but as this is an impossibility, we wish, through this catalogue, to express our gratitude for the thousands of letters we receive every year, praising our stock and our fair dealings. It is indeed gratifying to know that our stock has produced crops which have added untold wealth to millions of fruit growers all over these United States, who have supplied the markets with the products of their orchards, vineyards and berry plantations, besides producing delicious fruits for their own families, thus making prosperous, happy, and healthy homes.

It pays to buy the best, especially in plants and trees. It is a great satisfaction for the planter to know that he is getting dependable stock from a firm that has a reputation of thirty years of honest dealings. Read some of the many letters from satisfied customers.

Terms and Suggestions.

Makanda is on the great Illinois Central railroad running north and south, connecting with all the trunk lines running east and west. We are right in the heart of the famous fruit belt known the world over.

References. First National Bank, Anna, Ill.; Carbondale National Bank, Carbondale, Ill.; First State Bank, Makanda, Ill.; any business house, merchant or county officer.

Time of Shipment. All orders placed with us will be shipped in proper planting season if no shipping date is given; where shipping date is given we will ship as near that date as weather conditions will permit.

Remittance. Remittance should accompany the order. This is best because it saves time, overhead expense, chance for errors, and insures better and quicker service. However, we book orders and hold stock in customer's name when one-fourth of the amount accompanies the order.

How to Remit. Any way most convenient to you, by check, money order, bank draft or cash.

When to Order. The best time to order is just as soon as you receive this catalogue. Orders are handled here as they are received, stock is selected and reserved in customer's name, shipment is made at the proper time for planting in customer's locality. While we are usually able to make shipments on short notice, it is not advisable to wait till planting time before ordering as we are likely to be sold out on some of the very best varieties, and be forced to return your money.

Prices. The prices quoted in this catalogue are for the stock packed and delivered to express or postoffice. No extra charge is made for boxing or baling.

We Solicit Correspondence. Every inquiry will be given our prompt and personal attention; every question will be answered honestly and as accurately as possible. We will also be glad to give you any information regarding planting. However, we furnish free with every order where requested a book of instructions. We are always glad to offer any suggestions regarding the best varieties for different localities.

This catalogue conveys to you the absolute truth with regard to every description made in it, and you can expect to grow fruit just as described.

OUR GUARANTEE

We guarantee safe delivery of every order or money refunded. Our stock is sold direct to the growers at wholesale prices, cutting out the middleman's profit. WE GUARANTEE our plants to be first class in every way and with our careful methods of labeling it seems impossible for mistakes to occur, and we stand ready to make everything good that is not as represented.

Orting, Wash., May 1, 1923.
Dear Sirs:—Received your plants; they all arrived in good shape and are all set out and are looking fine. MRS. RUTH WADKINS.

Both Large and Small Peach Orchards are Profitable

Peaches That Pay Big Profits

Our seedlings were started from natural Peach pits produced in Tennessee and raised on land never before occupied by Peach trees. Our peach trees are budded with buds cut from the heaviest bearing trees in our own bearing orchards; we know that they are true to name; we have excellent stock to offer this season; it is thrifty and first class in every way, and we feel sure you will be more than pleased with it.

If you have a small farm or a little garden space that will grow a tree, by all means plant peaches. They come into bearing in 2 or three years, bear heavy crops; always bring high prices and nothing is so delicious as a good, ripe, juicy peach with the sweet juice running down the corners of your mouth while eating it, especially if it is picked fresh from your own trees.

Southern Illinois is a great peach belt. The fruit grown here is famous for its quality and beauty; and the trees started here have a hardiness and thriftiness that is even better known by growers everywhere.

Wholesale Price of First Class Peach Trees:		Each	10	25	100
2 to 3 feet	\$0.30	\$2.50	\$5.25	\$20.00
3 to 4 feet40	3.50	8.00	30.00
4 to 6 feet50	4.50	10.50	38.00
Wholesale Prices of Rochester and Ponderosa:		Each	10	25	100
2 to 3 feet	\$0.50	\$4.50	\$11.00	\$40.00
3 to 4 feet60	5.50	13.00	50.00
4 to 6 feet70	6.50	16.00	60.00

If the small sized Peach trees are wanted by mail add 3c each for postage.

The following 6 varieties of Peaches are the great commercial varieties of the United States, are all large yellow freestone varieties, and always command the highest market prices; covering a ripening season of nearly eight weeks. We call this our "BIG SIX YELLOW BEAUTIES." They are, or should be, grown in all commercial orchards. They are shipped in straight carload lots to all large cities where they find a ready market at very high prices. Never too many grown to glut the market. They are listed in their order of ripening. Rochester, Early Elberta, Elberta, J. H. Hale, Ponderosa, Krummel's October.

ROCHESTER. The earliest real good yellow freestone peach we know of. It is in a class by itself because it is the only good sized, yellow freestone peach ripening here in July. The fruit is large, yellow with a most attractive red blush; juicy and delicious and keeps well; an excellent shipper. Its greater sweetness over other peaches requires only half the usual quantity of sugar in canning. The tree is a strong grower; early and regular bearer of big crops and absolutely hardy. Ripening before Early Elberta. (See outside back cover.)

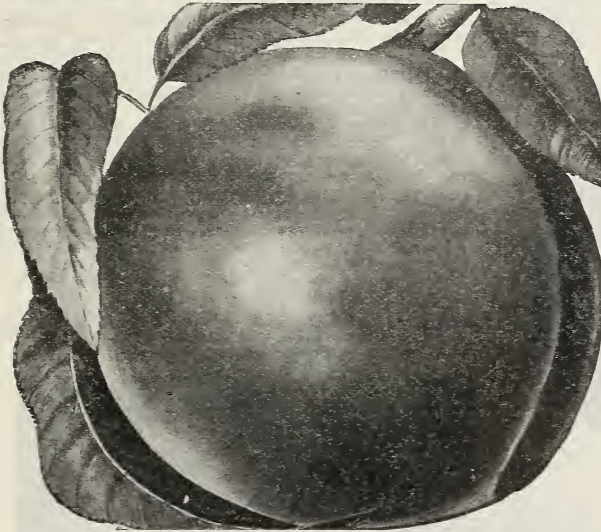

Peach Collection No. 2. 1 each above 6 varieties, 3 to 4 ft. \$1.65 postpaid.

OUR MOTTO OF "ONCE A CUSTOMER, ALWAYS A CUSTOMER," HAS BUILT UP A BUSINESS SECOND TO NONE.

EARLY ELBERTA. The greatest early yellow peach ever produced; as compared with Elberta it is larger, 10 days earlier, better colored, and of quality unsurpassed; has smaller seed, is finer grained, less fuzzy and a wonderful shipper. Fine flavor, melting and buttery; sweet and delicious. It colors all over before it softens, which makes it a great market variety. Trees very hardy, young and prolific bearer.

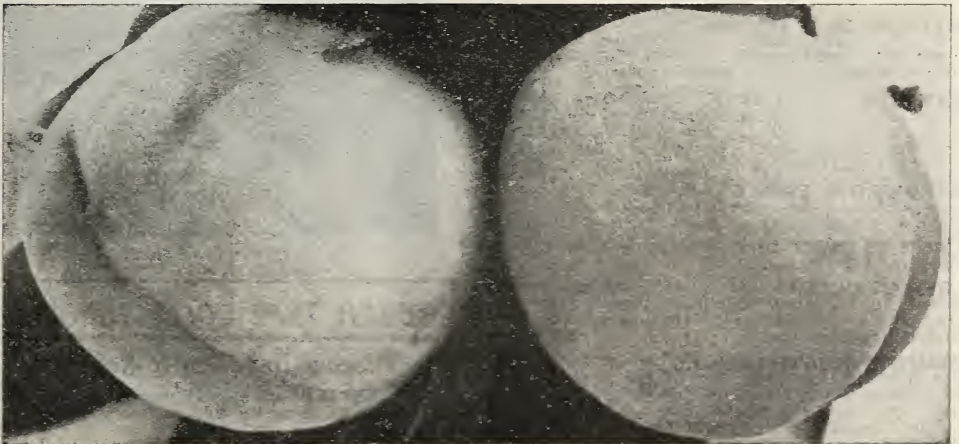

Early Elberta Peach.

Elberta Peach.

J. H. HALE. In size it is one-third larger than Elberta and is more highly colored. The skin is deep crimson, smooth, tight and without fuzz. Flesh is golden yellow, firm, and has a most delicious flavor. The pit separates easily from the flesh. It is exceptionally valuable as a commercial peach owing to its unusual keeping and shipping qualities. Will ship nearly as well as an apple. Your collection is incomplete without this variety.

KRUMMEL'S OCTOBER. The largest, handsomest and best of the very late yellow freestone peaches. Ripens after all other good yellow peaches are gone and commands high prices. Highly flavored and a favorite for sweet pickling and the only freestone peach that will stand up when so pickled.

Krummel's October Peaches.

The Famous Ponderosa Peach

(See illustration on front page.)

The Giant Four-in-One Peach—The New Variety That is Making Growers Rich

Did you ever eat anything so good in all your life? You will say this as many others have said thousands of times, when you taste the "Ponderosa," the most delicious of all peaches. How would you like to have a big rosy Ponderosa just chock full of sweet-as-honey juice, deliciously flavored? Great, flashing red and yellow beauties with a crisp, tender, juice-laden flesh, veritable nectar, clean seed, soft melting flavor—all that a perfect peach can be, and fully entitled to the name it bears, from these as well as

from other points of view, being the best seller, the best eater, the best canner, the best preserver. In fact, it is king of all midseason varieties; a quick grower, an early bearer and enormously productive.

Deep yellow thick skin, flesh deep yellow, firm, fine grained, sweet and luscious. Fruit much larger than Elberta. One grower picked five bushels from one tree that sold for \$4.00 per bushel, Elberta selling for \$3.00. Ponderosa should be planted in every family and commercial orchard.

Carman Peach.

MAYFLOWER. The earliest peach to ripen, earliest of all peaches. A gloriously beautiful "red all over" peach. Flesh creamy white tinted with red; juicy sweet and good.

CHAMPION. Fruit large, beautiful in appearance; flavor delicious, skin creamy white with red cheek; valuable for commercial orchards, extreme hardness and splendid quality make it a favorite. Freestone.

CRAWFORD'S EARLY. Freestone. A large, magnificent yellow peach of good quality; very popular variety.

LEMON CLING. Large oblong yellow peach; flesh firm, juicy and rich.

ELBERTA CLING. Great big yellow, sweet, juicy, fine flavored clingstone peach; skin yellow with red cheek, very valuable, sweet, juicy and delicious.

MAMMOTH HEATH CLING. One of the sweetest, juiciest, most luscious of the peach family—the housewife's favorite for canning and preserving. Creamy white in color with a red blush; smooth, clean, with very little fuzz. Large size, small pit and handsome. Good shipper; sells for fancy prices.

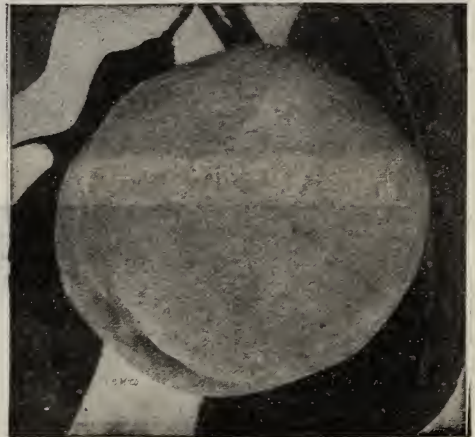

Other Standard Peaches

We have other standard varieties of Peaches ripening in the order listed and covering the entire peach season; all have many good qualities.

RED BIRD. Gloriously red all over; large as Elberta and very early, ripening immediately after Mayflower. A sensation everywhere, bright glowing red color, flesh white, sweet and juicy. Tree hardy, thrifty, and an early bearer. Early in spring people are fruit hungry and will pay big prices for good early peaches.

CARMAN. Fruit large, creamy white with a deep blush; flesh tender, fine flavor and very juicy; very hardy, and productive every year. A great favorite with many growers as it is one of the most profitable varieties ever introduced. The fruit stands shipping well and is good for the orchard or garden.

BELLE OF GEORGIA. Freestone. Large and showy; skin white, red cheek; flesh white, firm and sweet, a great market variety.

Mayflower Peach.

PEACH TREE COLLECTION No. 1

From a Successful Fruit Grower

Sumner, Ill., Jan. 2, 1923.

Bradley Brothers,
Makanda, Ill.

Dear Sirs:—I received your new catalogue, and I want to change my order some. I would like to have 1000 trees instead of 800. I would like to have 600 J.H. Hale, 200 Krummel's October, 100 Carman, 100 Mammoth Heath Cling, 25 Mayflower, 40 Red Bird, 35 Ponderosa. Please let me know what your prices are on these trees, as I want that many. I got some trees of you, it will be three years this spring and last fall. My trees were only two years old and I got as many as a bushel to the tree. I have 40 acres close to Sumner on the rock road and I want to set it all out in orchard just as fast as I can, but I can only set out 1000 trees this spring. Let me hear from you at once, as I want good trees.

S. S. VAN SCYOC,
Lawrence Co.

**IT PAYS TO GROW
THE BEST**

Mr. Van Scyoc's Three-year-old Ponderosa Peach Tree.

Sumner, Ill., Sept. 16, 1923.

Bradley Brothers,
Makanda, Ill.

Gentlemen:—The trees I purchased from you last spring are growing fine, only lost a very few from the 1000 trees and they were planted in bad soggy ground. I am enclosing pictures of some of the trees purchased from you. Picture No. 1, Early Elberta, three years old, had 4 bushels of peaches this year, sold at stores in Sumner for \$3.00 per bushel, also had a good crop at two years old. Picture No. 2, Heath Cling, 3 years old, also had a good crop at two years. Picture No. 3, Ponderosa; I think this is a fine tree, big fine peaches—big as Hale, finest peach I ever tasted. Everybody was crazy for them, they thought they were the finest they ever tasted. The Ponderosa bore three bushels to the tree this year. All these trees were bought of Bradley Brothers in the spring of 1920. Am also enclosing a clipping from the Sumner paper about my orchard. All the trees I got from you were just as ordered; I got some from another nursery, that were about half seedlings. I have many people ask about my trees and I always tell them to order from Bradley's if they want the best.

Yours respectfully,

S. S. VAN SCYOC,

On account of space we are only able to show one of the pictures sent by Mr. Van Scyoc.

Following are a few paragraphs taken from a clipping from the Sumner Press, after they had visited Mr. Van Scyoc's orchard.

Out on the Van Scyoc forty, on the clay ridge that lies east of Sumner, are three-year-old Hale and Elberta peach trees in luxuriant growth, this year's switches, springing out 3 to 5 feet with the season's growth incomplete. Here are three-year-old trees loaded with from one to two-and-a-half bushels each of good fruit, trees planted in 1922 as large as four-year-olds, in many cases bearing fruit, and this year's planting in a thriving condition. On one one-year-old Hale we counted 9 perfect peaches.

Mr. Van Scyoc set out his first hundred trees in 1920 on forty dollar land, now he has eighteen acres solid, with considerable apple and cherry; he has brought up his orchard to such a point that it is well worth a horticulturalist's time to go and see it. It is our opinion that considerable planting of choice apple, peach, pear, cherry, grape and berries will be a success most anywhere.

Apples—King of Fruits

The apple is the king of fruits. It is a tonic as well as a nutrient, and one of the cheapest and most wholesome foods. There's a lot of truth in the old saying, "An apple a day keeps the doctor away." Apple trees will grow wherever corn can be raised, in fact, there isn't a state in the Union where some variety of apples will not thrive. Every home garden and farm should have at least a few apple trees of summer, fall and winter varieties.

Prices of all varieties 2-year-old trees.

First Class.	Each	10	25	100
3 to 4 feet ...	\$0.50	\$4.50	\$10.00	\$35.00
4 to 5 feet60	5.50	12.50	45.00
5 to 7 feet90	8.50	20.00	75.00

Our 5 to 7 foot trees are heavy selected specimens, fall branched and extra well rooted trees.

Prices of all varieties 1-year-old trees.

First Class.	Each	10	25	100
2 to 3 feet ...	\$0.25	\$2.15	\$4.00	\$16.00
3 to 4 feet30	2.00	5.50	20.00

If 1-year-old trees are wanted by mail add 3c each for postage.

Write for special prices on Apple trees in larger quantity than quoted.

Early Harvest Apple.

APPLE COLLECTION

This collection will give you fruit all summer and fall and until freezing weather. Makes a fine home orchard.

One each of the 20 varieties 4 to 5 feet, two-year-old, by prepaid express for **\$10.00**

Early Summer Apples

LIVELAND RASPBERRY. Extra early, skin of a bluish or pinkish red. Flesh white as snow, tender, fine grained, juicy, mild and just the right degree of tartness. Tree an upright grower, thrifty and abundant bearer; begin to bear the third year.

WILSON RED JUNE. Tree is extremely hardy in Minnesota, Wisconsin and Canada. Fruit enormous in size and a deep dark red color; even more brilliant than the Carolina Red June. We know of no apple that will compare with it for beauty, size and fine quality. Long season of ripening, very often lasting 4 to 6 weeks from the time the first apple is ripe until they are gone, hence one of the best for family use.

EARLY HARVEST. Large; pale yellow; tender, with a fine flavor; a good grower and a heavy bearer; about the first to ripen.

YELLOW TRANSPARENT. An upright, vigorous tree; fruit of good, crisp, sub-acid, delightful, fragrant flavor. It is one of the finest apples to ripen in the early summer when the demand for fruit is greatest and prices high. Yellow Transparent and Liveland Raspberry sold here in Southern Illinois last summer from \$3.00 to \$4.50 per bushel in carload lots with a demand greater than the supply.

Yellow Transparent Apple.

Reasons Why You Should Plant BRADLEY'S TREES

Quality the best. Trees straight, smooth, well formed and true to name. Prices, "live and let live." Trees will thrive and produce fine fruit in every section of the United States. Trees are triple inspected—only the good trees go to you—read our guarantee. Trees have perfect root system due to whole root grafting and budding, much cultivation and proper digging. Only standard varieties for home use and orchard planting. Our trees are grown on land best suited for their needs.

THRIFTY FRUITS FOR EVERY MAN'S GARDEN—LITTLE COST, LITTLE SPACE, LITTLE LABOR, BRING BIG RETURNS.

Late Summer and Early Fall Apples

DUCHESS OF OLDENBURG. Medium pale yellow, streaked red; bears young and is a good cropper; useful for fall purposes; fine for market with a great demand.

GOLDEN SWEET. Large size; attractive, clear, rich, sweet, very good in flavor and quality. Fine for home use. Tree a good grower, healthy and productive.

FALL PIPPIN. Very large; yellow; flesh tender and delicious; tree free grower and a fine bearer; valuable for table and market.

WEALTHY. Large; brilliant red; rich sub-acid flavor, excellent quality; good keeper; highly recommended; keeps well in storage.

Golden
Sweet
Apple.

Late Fall and Winter Apples

JONATHAN. A brilliant glossy red apple with a spicy rich acidity that has made it a great favorite with all lovers of deliciously flavored apples. Succeeds everywhere. Fruit firm, crisp, tender, juicy and rich. Jonathan is a great commercial apple and a splendid family sort and for many years Jonathan has been the standard of quality by which other sorts have been gauged.

GRIMES GOLDEN. Large; golden yellow skin, sprinkled with gray dots; flesh crisp, mild, tender, juicy and very delicious; tree hardy, vigorous and productive.

GANO. Large handsome apple; has a glossy deep red skin; flesh white, juicy; pleasant flavor.

ROME BEAUTY. Large, mottled and striped in different shades of red; the flavor and quality is far above the average; popular with both consumers and dealers. Rome Beauty orchards have been planted by thousands of acres and the fruit has always brought fancy prices; should be planted in every orchard and every family fruit garden.

BALDWIN. Large; bright red; crisp, juicy and rich; one of the most popular and profitable sorts for any purpose. Very productive, having produced 681 bushels of apples in one season from one acre.

Book of Culture sent on request.

Jonathan Apples.

WHEN BETTER NURSERY STOCK IS GROWN BRADLEY'S WILL GROW IT.

Golden
Pippin
Apple.

STAYMAN WINESAP. Best of the Wine-sap family. Deep red, distinctly striped with carmine; of large size and very handsome. The quality is delicious and indescribable; the flesh is juicy and crisp, with a mild and pleasing acidity and a flavor that has made it one of the most sought for apples. A great favorite in all markets. Fruit very large, very fine color and a long keeper. The tree is a very rank grower, productive and very hardy even in the extreme Northern States. (See illustration inside back cover.)

YELLOW BELLFLOWER. Large, yellow, with a tinge of red; flesh crisp, with aromatic flavor. Beautiful and excellent fruit.

YORK IMPERIAL. Medium; whitish, shaded with crimson; firm, crisp, juicy, pleasant, mild, sub-acid; vigorous and productive.

WINESAP. An old standby. Standard, well known, productive variety; medium size, oblong, smooth dark red; flesh yellow, crisp, tender, juicy, firm and good.

Crab Apples

HYSLOP. Deep crimson, covered with blue bloom; very desirable.

MARTHA. Bright glossy yellow, shaded with bright red.

RED SIBERIAN. Yellow, with scarlet cheek; crisp, tender and juicy.

TRANSCENDENT. Golden yellow, striped with red; crisp, juicy, yellow flesh.

WHITNEY. Large; skin smooth, glossy green, striped and splashed with carmine, flesh firm and juicy and of very pleasant flavor.

YELLOW SIBERIAN (Golden Beauty.) Large; golden yellow, crisp, juicy and splendid for eating or cider.
Price same as apples.

WINTER APPLES—Continued

GOLDEN PIPPIN. It is far richer, spicier, juicier and finer flavored than Grimes Golden; of deep, rich golden color and is very handsome. One of the best eating apples grown. For baking it has no equal. The tree bears when 3 years old; is an enormous yielder, hardy, thrifty and free from any disease. Fruit is a long keeper, and one of the last apples on the market in the spring. It should be in every garden.

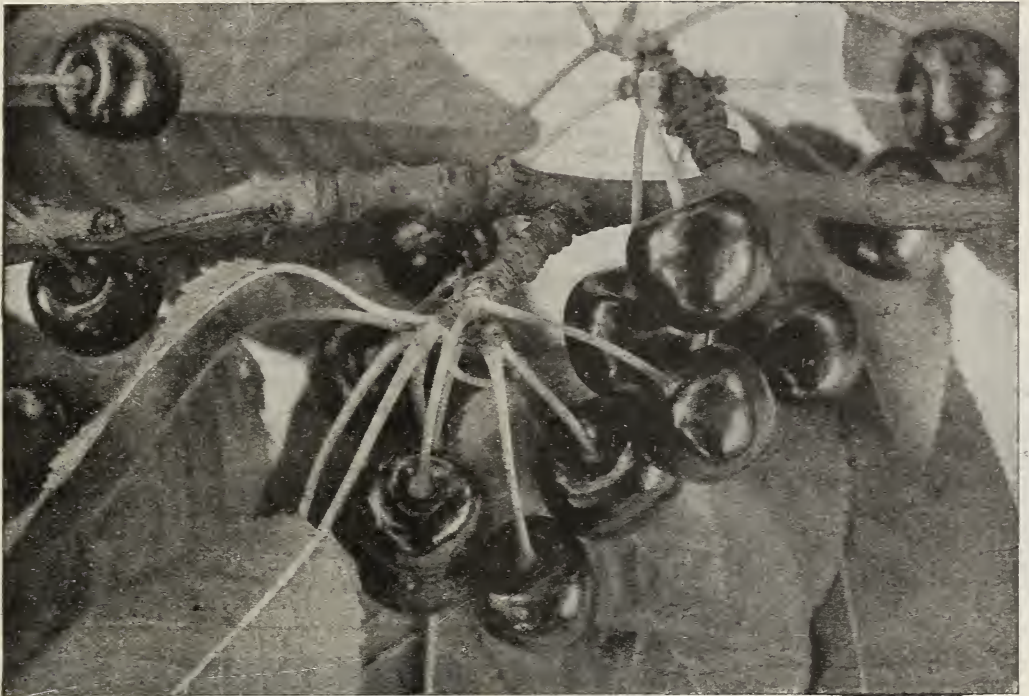

WINTER BANANA. Fruit large, clear pale yellow with beautiful contrasting pinkish-red blush. Flesh is yellowish white, tender, mild and sub-acid; flavored like a banana. Excels as a dessert apple. Tree comes into bearing at an early age and bears annually. The fruit sells for the highest price on the market when packed for fancy trade.

DELICIOUS (Genuine). A remarkable variety, rapidly taking first rank both for commercial and home orchards. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh finely grained, crisp and melting, juicy with a delightful aroma; of highest quality. A splendid keeper and shipper. (See illustration on page 26.)

Book of Culture sent on request.

York Imperial Apple

Large Montmorency Cherries.

Select Cherry Trees

Few trees combine the useful and ornamental in such a large degree as the Cherry. They make an exceedingly handsome shade tree, worthy of a place in every yard or lawn. Or they can be grown in any spare or waste space or corner, no matter how rough and stony, needing no cultivation after the first two or three years, and they are very long lived. A rich pie filled with big, ripe, juicy cherries of unsurpassable goodness is irresistible. None of the Cherry's goodness has been lost when it is covered with a flaky, melt-in-the-mouth crust like mother used to make. It's all there, both in the rich fruit itself, and in that sugary syrup—the pure juice of fresh, ripe cherries.

Wholesale Price of Cherry Trees:		Each	10	25	100
2 to 3 feet	\$0.50	\$4.90	\$12.00	\$45.00
3 to 4 feet70	6.50	14.00	60.00
4 to 5 feet85	8.00	19.00	75.00
5 to 7 feet	1.25	10.00	Extra fine heavy	

trees. Our 5 to 7 foot trees are of bearing size.

Wholesale Price of Abundance and Burbank Cherries:		Each	10	25	100
3 to 4 feet	\$1.25	\$11.00	\$26.00	\$100.00
4 to 6 feet	1.50	14.00	31.00	120.00

YELLOW SPANISH. Large, handsome, sweet cherry with light red cheek, firm and delicious. Tree vigorous in growth and productive.

BLACK TARTARIAN. Very large; purplish black; flavor mild and pleasant; very productive.

MORELLO. English. Large; dark red; very juicy, sub-acid.

MONTMORENCY, LARGE. A beautiful large red sour Cherry. Cannot be too highly recommended for quality and quantity of fruit, hardiness and beauty of tree, and for its never failing crops. Ripens 10 days later than Early Richmond. Has very firm flesh and ships extra well.

Wellston, Mo.

April 10, 1923.

Dear Sirs:—We received our shipment of plants and trees this morning and were very glad to get them, everything came just as ordered—nice stock—we will always remember where to buy from now on.

TONY FORRIST.

Baldwin Cherries.

Abundance Cherries

(See center color page)

A Wonderful, Hardy Sweet Cherry

A very hardy sweet Cherry for the North, South, East and West. Succeeds where other Sweets are failures, and is very hardy, productive and fine everywhere. A seedling of Royal Anne. Fruit is much larger, measuring three and one-half inches in circumference. Ripens one week later, is sweeter, richer and more delicious and hang on the tree 10 days after they are ripe. Will outyield any other variety known. One of Burbank's latest productions. Known as the Million Dollar Cherry.

Burbank Cherries

(See outside back cover)

The earliest of all the large cherries; is extremely large, very attractive, deep crimson color, superior quality; flesh firm, meaty and delicious. Enormously productive and bring the highest market price on account of their extreme earliness. This cherry means big profits to you. Trees very hardy, thrifty and begin to bear when quite young.

The Carbondale National Bank Carbondale, Ill.

October 9th, 1923.

To Whom It May Concern:—

The firm of Bradley Brothers, Makanda, Illinois, has been doing business with us for the past ten years. Our business relations with them have been very satisfactory.

Carbondale National Bank,

CHERRIES—Continued

BALDWIN. Fruit very large, dark red, the sweetest and richest of all sweet Cherries. Remarkable for earliness, quality, vigor, hardiness and productiveness. It is a splendid shipper and fine for canning. To eat out of hand it is unsurpassed. Flesh is very firm and juicy.

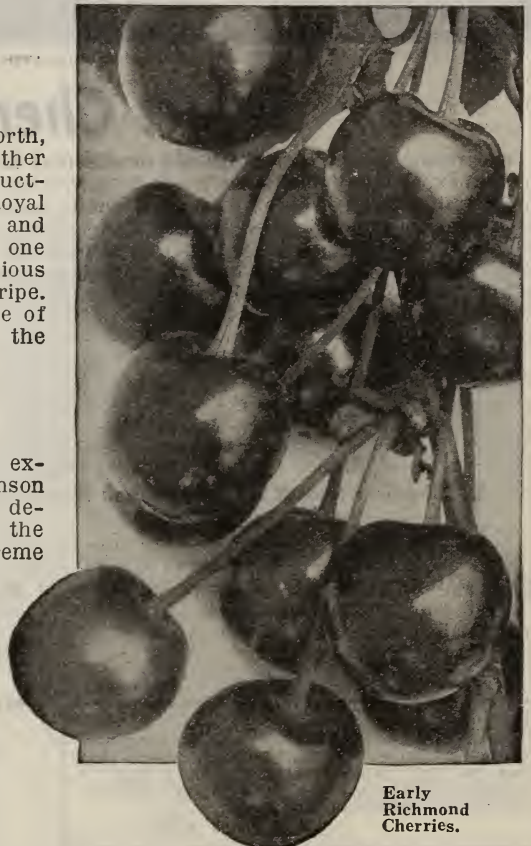

EARLY RICHMOND. Is a wonderful bearer and cannot be surpassed for hardiness. Fruit of medium size, roundish, dark red; flesh tender, juicy and sub-acid. Tree vigorous and long lived. Excellent for canning and drying.

WRAGG (Very late.) Of the Morello type and largely planted. Especially popular in Colorado. In all sour cherry sections fewer Morellos are being planted and more and more Montmorencies. Abundant and regular bearer, dwarfish in growth and is resistant to disease.

CHERRY TREE COLLECTION

This is a great bargain and all our customers should take advantage of it.

One tree each of the 9 varieties, size 3 to 4 foot trees, prepaid by Express, for **\$5.00**

Early Richmond Cherries.

Select Standard Pears

The pear is one of the highest quality fruits. In nothing else that grows, and in no confection made, can you get the refreshing acid, rich in spices, the honeyed sweetness, and delicacy of flavor which you find in your own garden or orchard. Plant the right selection of varieties and you can have Pears from early summer until Christmas. The following are varieties that have stood the test and are the best.

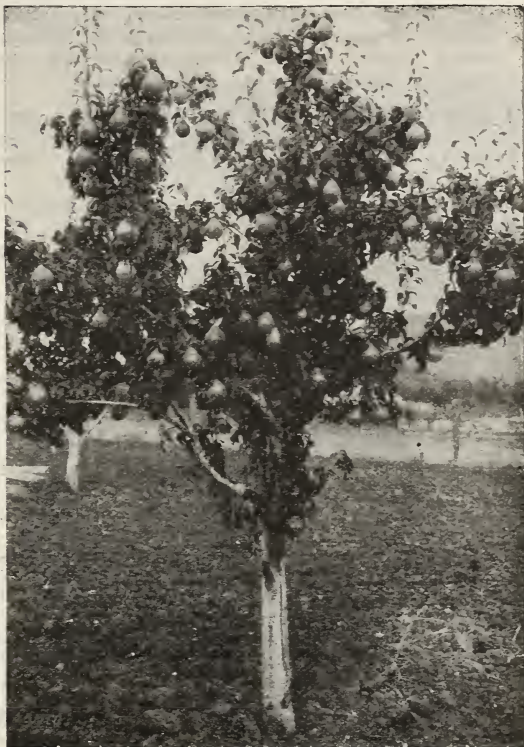

BOSC—King of Pears

(See illustration on back cover)

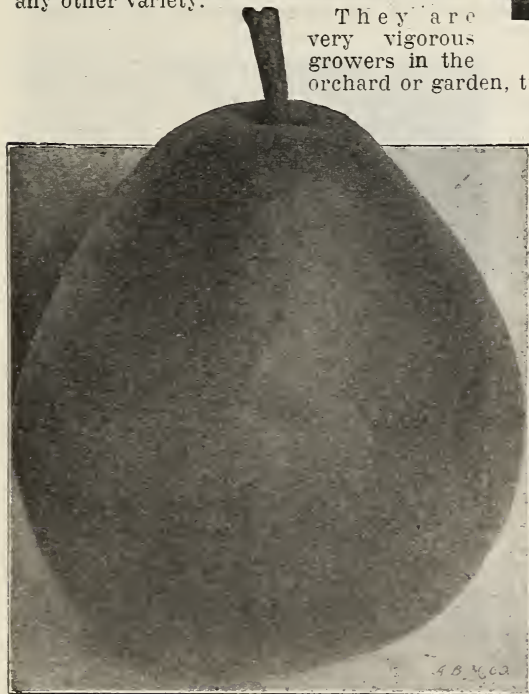

After fruiting it many years we find it to be one of the most perfect pears grown. It excels everything else in the world in the way of pears. Extra large size, beautiful shape and color and of most delicious flavor, with excellent spicy flavor pronounced. This is a great money maker. Mr. Thompson of Illinois sold \$66.00 worth of pears from 4 trees and they bear the beautiful pears every year, no off seasons. They are of a long ripening season, extending over a period of 4 weeks. We especially recommend the Bosc Pear for productiveness, large size, great beauty, extra fine quality and keeping qualities. Pear much larger than Bartlett. It is a great family pear. Bosc pear trees are hard to propagate and grow in the nursery and the price of trees will always be higher than any other variety.

They are very vigorous growers in the

orchard or garden, tree hardy and never affected with blight. See what loads of pears they will bear as shown in cut.

A Young Bosc Pear Tree Bearing a Full Crop.

Lincoln—The Greatest of All Pears.

LINCOLN—Greatest of All Pears

Lincoln is by far the greatest pear ever introduced. The great "blight-proof pear," heavy croppers, living and bearing heavy crops long after all other varieties are dead and gone. The old original tree which is now eighty-three years old, is still bearing heavy crops of fine, sweet, juicy and delicious pears. Lincoln is the best flavored, best for eating fresh, canning, or preserving, and very handsome. Larger and better quality than Bartlett or Seckel. Brings the highest prices, selling for \$3.00 to \$4.00 a bushel, being so large that it attracts the attention of everybody, and is better than it looks. Comes into bearing at 2 years old and is an annual and prolific bearer. Should be in every home orchard and in every door yard. We have the genuine Lincoln which was originated by E. W. Jones of Illinois.

OUR FREE SERVICE DEPARTMENT IS ALWAYS AT YOUR SERVICE.

PEARS—Continued

BARTLETT. One of the best and most popular of all pears for market and home use. It is a rich golden yellow color when ripe, often with a soft blush on sunny side. It is very large, thin skinned; flesh buttery and melting, and has a rich musky flavor. Tree a strong grower and a young and abundant bearer.

CLAPP'S FAVORITE. This is without doubt the most productive pear in cultivation. It is of very large size; pale yellow color with a crimson blush. The flesh is finely grained, juicy, melting and buttery. Very desirable in all sections, and especially so where all other varieties fail.

Winter Nellis Pear.

WINTER NELLIS. One of the best early winter pears. Medium; greenish yellow; spotted with russet; very rich flavor.

Wholesale Price of Standard Pears:

First Class	Each	10	25
3 to 4 feet	\$0.65	\$6.00
4 to 5 feet80	7.50
5 to 7 feet	1.00	9.50

Price of Bosc and Lincoln Pears:

First Class	Each	10	25
3 to 4 feet	\$0.90	\$8.50
4 to 5 feet80	7.50
5 to 7 feet	1.25	12.00
			25.00

Our 5 to 7 foot Pear trees are extra fancy trees, almost bearing size, and are selected specimens.

Pear Tree Collection

This is a special bargain.
One tree each of the 10 varieties; 10 trees in all, 4 to 5 feet high, by pre-paid express, for **\$4.60**

FLEMISH BEAUTY.

Large and symmetrical; greenish yellow and brown, with large spots of russet; rich and juicy.

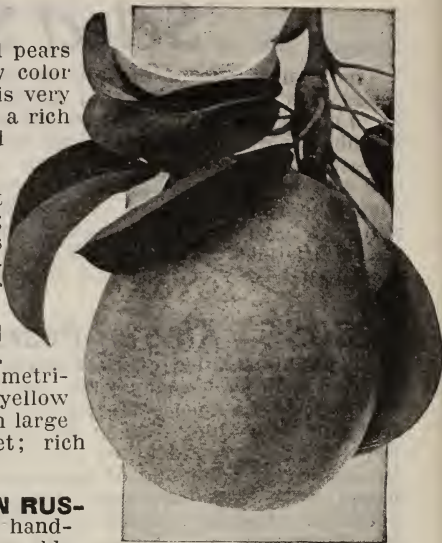

JAPAN GOLDEN RUSSET.

Large; handsome, flat fruit; golden russet color; an enormous bearer; fine for cooking.

SECKEL. Small; yellowish russet; flesh whitish, buttery, very sweet and melting. The hardiest and healthiest of all.

KIEFFER. Large; golden yellow when ripe; flesh slightly coarse, juicy, with quince flavor; fine for canning.

GARBER. Very productive and bears young; heavy cropper; excellent for preserving.

Flemish Beauty Pear.

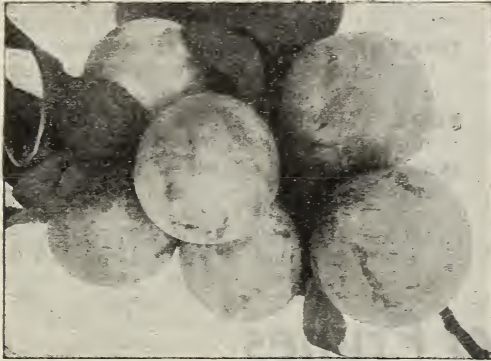

Kieffer Pear.

Select Hardy Plum Trees

Plums are especially fine for eating fresh, for jellies, preserving, marmalades, canning and drying. Children and invalids eat the best sweet varieties not only with safety but positive benefit. It is one of the best fruit trees for the home garden and offers great capacity for development commercially.

ABUNDANCE. Tree rapid grower, very productive, comes into bearing when quite young. Fruit large, amber, splashed with red; juicy, sweet and good.

AMERICA. Large glossy coral red, very beautiful; firm, sweet and juicy. Blooms late and scarcely ever gets killed by frost. Bears enormous crops every year. Tree very hardy and thrifty grower.

Mikado Plums.

Abundance Plums.

MAMMOTH GOLD. A great big luscious red blushed, golden plum of enormous size; extremely early and brings fancy prices on the market and supplies the table before other varieties are ripe. Free from rot; begin to bear the second year and very productive.

BURBANK. Fruit large, oval, reddish purple skin, flesh yellow, juicy and sweet. Tree extremely hardy and productive; succeeds everywhere.

OMAHA. Very large, round dark rich red; flesh meaty and delicious. The pit is small and quality unsurpassed. Tree hardy as an oak and succeeds both North and South.

SHROPSHIRE DAMSON (Improved). The largest of all Damsons and the fruit is sought after on the market at fancy prices. Trees bear enormous crops with little or no care and every garden and home should contain one or two Shropshire and Omaha trees. Dark purple, juicy and rich.

WANETA (See inside back cover). The most delicious of all Plums. The Waneta Plum is absolutely the largest and best of all Prof. Hanson's introductions, and this means they are better than anything grown at the present time. Extra large size, often 2 inches in diameter. With reasonable cultivation it is as large as a small apple, as large as a good large peach, and is hardy anywhere in the far Northern States. An early and abundant bearer. It was the largest of 10,000 seedlings. It combines hardness, immense size, delicious quality, long keeping, beautiful color, small pit; an early and prolific bearer, often producing a good crop in two years from planting. Price, 4 to 5 ft. trees, \$1.00 each; 4 for \$3.50.

Mammoth Gold Plums.

Opata Plums.

PLUM COLLECTION

One tree each of the 14 varieties, 4 to 5 feet, delivered by express to your nearest express office, for only **\$5.00**

Sugar Sweet Prunes

NEW STANDARD PRUNE.

New Standard Prune is one of BURBANK'S latest and best productions and adds millions of dollars to the prune industry. Trees enormous, never failing bearers, and good, strong, healthy growers; very hardy in all climates. Well grown fruit measures $4\frac{1}{2}$ inches around one way by nearly 6 inches the long way. Skin purple, with a heavy blue bloom; flesh amber or honey yellow, fine grained, juicy yet firmer than most other drying prunes, very sweet, perfect freestone and never rot but dries up while on the tree. Price, 4 to 6 foot trees \$2.00 each; 3 for \$5.00. Stock very scarce.

WHY NOT GROW AND PUT UP YOUR OWN PRUNES? You can very easily do so by planting a few trees of the STANDARD Prunes.

SUGAR PRUNE. Trees are enormous never failing bearers, good healthy and hardy growers. Fruit very large, purple skin, fine grained; flesh tender and rich in sugar and very fine for drying. Price, 4 to 6 foot trees, \$1.25 each; 3 trees for \$3.25.

GIANT PRUNE. Largest prune known; fruit averaging 2 ounces each; retaining the good qualities of the smaller varieties. Skin purple, with a heavy blue bloom; flesh yellow or amber, fine grained, juicy, firm and very sweet and a perfect freestone; never rots. Tree hardy, thrifty and very productive. Price, 4 to 6 feet trees, \$1.50 each, or 3 for \$4.00.

Sugar Prune Collection

One tree each of the above 4 varieties, 4 trees in all, 4 to 6 feet high and first-class trees, by prepaid express, **\$5.00**
for

MIKADO. A very large plum of greenish yellow color; nearly round; very little suture; a very rapid grower, more so than any other. This is the most remarkable of all plums for its enormous size, beauty and good quality. It is probably the largest plum in existence.

SHIPPER'S PRIDE. Large, nearly round; dark purple; flesh firm, juicy and sweet; excellent for canning. Hardy and productive.

WICKSON. Very large; deep maroon red; small stone; flesh firm, delicious and sweet.

YELLOW EGG. Large; yellow; oval; flesh yellow, juicy and rich. Vigorous and productive.

HANSKA. Fruit large; best quality for eating from the tree, canning, preserving and jelly.

OPATA. Begin to bear at one year old; hardy, thrifty and productive. Dark red; rich sweet and delicious.

SAPA. Medium; fine flavor, excellent shipper; tree hardy and productive.

Wholesale Price of Plum Trees Except Waneta:

	Each	10	25	100
3 to 4 ft.	\$0.40	\$3.50	\$7.50	\$27.50
4 to 5 ft.	.60	5.25	12.00	38.00
5 to 7 ft.	.90	8.50	18.50	65.00

AUSTRALIAN PRUNE. Fruit is the handsomest and as large as GIANT; dark reddish purple in color. Flesh golden yellow; very sweet, delicious, melting and mild; excellent quality. Good keeper, never rots; ships extra well. Tree vigorous, upright, hardy, thrifty grower, young and abundant bearer. Price, 4 to 6 foot trees, \$1.75 each; 3 for \$4.50.

New Standard Prunes.

IT HAS TAKEN THIRTY YEARS OF HARD WORK TO BUILD UP OUR PRESENT REPUTATION, BUT IT IS WORTH IT.

Selected Apricots

The Apricot is one of the most delightfully luscious fruits grown. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

Apricots are believed to have been a cross between the peach and the plum, having the shape and color of the peach, but in texture and smoothness of skin it resembles the plum.

MOORPARK. One of the largest. Yellow with red cheek, firm, juicy and very productive. An old dependable variety.

SUPERB. The best apricot for eastern planting, large size; smooth light salmon color; with red dots; flesh yellow, firm sub-acid. Tree very hardy, vigorous grower; very productive; latest blooming apricot; adapted to all peach regions.

STELLA. Unsurpassed for productiveness, size and color. The hardest apricot known; harder than most apples, peaches, and plums. Stella bears heavy crops when all other varieties are killed.

Price of Apricots:

	Each	6	Doz.	25	100
3 to 4 foot grade	\$0.65	\$3.50	\$6.50	\$12.50	\$45.00
4 to 6 foot grade80	4.50	8.50	16.00	60.00

Moorpark Apricots.

Pineapple Quince.

Price of Quinces:

	Each	6	Doz.	25	100
2½ to 4 foot grade	\$0.80	\$4.50	\$8.50	\$16.50	\$60.00
4 to 6 foot grade90	5.00	9.50	18.00	70.00

Selected Quinces

The Quince is the ideal fruit for flavoring, preserves, jellies, marmalade and cooked fruit, being a great favorite of the housewife for this purpose. Every home should contain several trees; especially suited for yards and gardens.

PINEAPPLE QUINCE. Flavor is suggestive of the pineapple; in flavor, texture and quality it is unapproached; delightfully fragrant; fine for baking; canned or dried it retains the quince flavor. Can be eaten like an apple, and is far the best variety for jellies and preserving. Pineapple is the most profitable; the tree is healthy, hardy and very prolific and comes in bearing when quite young. Size enormous, weighing over 1 pound each.

BOUGEAT QUINCE. A very large handsome quince; strong grower, young and prolific bearer. Rich and aromatic; fruit golden, big, fine flavored.

ORANGE QUINCE. Large; bright golden yellow. Flesh firm and tough until cooked, when it becomes tender, juicy and excellent flavor. Tree productive.

North American Mulberries.

Everbearing Mulberries

Everbearing Mulberries are very rapid growers and come into bearing at two and three years from planting; then for months they continue to produce large quantities of fruit good to eat and fine for poultry.

NEW AMERICAN. Largest of all the Mulberries; bears heavy crops at 3 years old. Fruit jet black and excellent quality. Tree a rapid grower, handsome for the park or lawn; they bear fruit continuously from May to August. Price, 4 to 6 foot trees, 90c each; 3 for \$2.25.

DOWNING EVERBEARING. The beauty and handsome shape of this as a lawn or park tree is quite enough to recommend it but in addition it yields an abundant supply of its large refreshing berries for about 3 months. No raiser of chickens can afford to be without them even if they cost \$5 a tree. Price, 4 to 6 foot trees, 75c each; 3 for \$2.00.

Rhubarb or Pie Plant

This deserves to be ranked among the best early vegetables of the garden. Scarcely has the grass begun to grow when your table can be supplied with this earliest of all vegetables. Excellent for sauce and pies, continues long in use and is valuable for canning for winter use. Should be in every garden or lot as you get more value for your money from Rhubarb than from any other vegetable grown.

NILES GIANT RHUBARB. New.

Originated in California. The stalks are very large, tender, crisp, sweet and very delicious. It is a very rapid grower and very early; it has deep red stalks which give the sauce when cooked a fine light red color. This variety of Rhubarb is so sweet that it needs but very little sugar; do away with the old expensive sour varieties and plant the Niles Giant. This is a very promising variety which succeeds in all climates and in all soils and we want every person to plant some of each of the three varieties.

Price, 3 for 50c; 7 for \$1.00; 15 for \$2.00; 50 for \$5.00, prepaid.

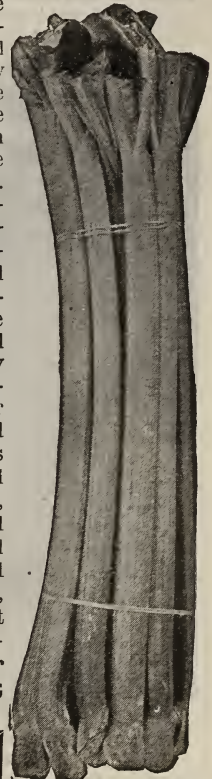

WAGONER'S GIANT RHUBARB.

This wonderful new variety is creating quite a sensation all over the country, everybody wanting some of this variety; all that have tried it want more. Stalks will average 8 to 12 ounces each. It is remarkably early, bearing large stems within five months from planting of the seed; and grows nearly the entire year when the frost is out of the ground. The stems are so tender that they do not need peeling.

Price, 3 for 60c; 6 for \$1.00; 25 for \$3.00; postpaid.

BURBANK'S GIANT CRIMSON.

This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and all fall, while the common or sour sorts are fit for use only a few weeks in the spring. As fast as stalks are pulled new ones take their places. Scarcely has the frost disappeared until your table is supplied with this delicious, refreshing and healthful article of food which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright crimson color, very tender, crisp, and of mild delightful flavor; the skin is so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will average 18 to 24 inches long, broad, thick, and solid; stalks will weigh on an average $\frac{1}{2}$ pound each and often weigh a full pound. Enormously productive, brings high prices and is a great money-maker and in great demand. Price, strong roots, 3 for 50c; 7 for \$1.00; 15 for \$2.00; 50 for \$5.00, postpaid.

Burbank's Giant Crimson Rhubarb.

RHUBARB COLLECTION 12 roots in all, making one of the finest Rhubarb Collections that could be had at any price and will make plenty of fresh stalks all summer for any family. Four strong roots each of the three varieties, postpaid, for **\$1.50**

Our Select Hardy Grapes

GROW YOUR OWN GRAPES, HAVE FRESH GRAPES FROM EARLY SUMMER TILL WINTER. MAKE YOUR OWN GRAPE JUICE, JELLY, ETC.

Book of Culture Instructions furnished on request with each order for Grape Vines.

The grape is the most healthful of all fruits and the most highly esteemed for its many uses. It can be and should be grown by everyone who has a garden, a yard, a fence or a wall. It can be confined to a stake, bound to a trellis, trained over an arbor, or extended until it covers a large tree or building and still it yields its graceful bunches of luscious fruit. They are hardy, vigorous, productive—and begin to bear the second or third year. Surely no one will allow their family to be deprived of delicious grapes when they can be produced so easily in the garden or yard.

The Marvelous Grape

Marvelous as to productiveness, size of bunch and berries. The earliest black grape. Sweetest and best in quality. Ripens week ahead of Moore's Early. Markets take them very readily at the highest prices. Hardy, vigorous grower, productive, healthy and the foliage immune from rust.

Grapes do not crack in wet weather; never mildews or rots and hangs well on the vine, drying up almost into raisins. One of the very best for family use as well as a commercial variety. The bunches are shouldered and weigh from 16 to 20 ounces. Pulp, very tender and dissolves readily in the mouth.

What the Experts Say of Marvelous: I believe it is the best flavored and the most delicious grape I have ever eaten. Fruit and bunches very handsome and attractive.—H. R. Row.

CAMPBELL'S EARLY. Handsome black berries, with purple bloom; bunch large, double shouldered and compact. Flesh sweet to the center; skin tough and a good shipper. Early.

BETA. Bunch large and compact; berry black, medium size, very early; rank grower, extremely hardy and enormously productive. Does well in the extreme North.

CONCORD. Black. The most extensively planted and generally successful grape in America. Bunch and berry large, fair quality, medium early; rank grower, healthy, hardy and productive.

PREMIUM

1 Hubbard grape or 1 Bradley's Beauty Rose free with an order amounting to two dollars or more. Only one free plant given with any order.

The
Marvelous
Grape.

The Wonderful Hubbard

(See inside back cover)

The Famous Table Grape—the finest early black grape, the sweetest, richest and most delicate grape yet produced. The texture is tender, pulp melting, flavor pure and refined, brisk, refreshing and honey-sweet. There is no other grape that approaches it in fine quality or flavor. Ripening 10 days before Concord, Hubbard is so rich in sugar it is excellent in flavor ten days before it is ripe. It is beyond doubt the sweetest and best flavored of any grape including the California and European varieties. Bunches extra large, very compact, and solid; berry extra large, jet black with a thin skin; seeds few and small which separate freely from the tender pulp. The fruit sells in the open market for double the price of any other variety. The vine is a vigorous grower, enormously productive, very often yielding 40 to 60 pounds to a single vine. The fruit is absolutely immune to rot; it has never been known to winter kill, and always yields a full crop and ripens up to perfection. Hubbard is an ideal grape for the North where early extra hardy varieties are wanted, and it thrives on any kind of soil and it should be planted in every garden. We consider the Hubbard by far the best grape for the table; for jellies, canning, preserving and for grape juice it is unsurpassed.

The Hubbard was awarded the Wilder silver medal by the America Pomological Society at its meeting in Berkeley, Cal., in competition with California's best varieties. This grape is in great demand by all grape growers everywhere.

DAISY. Black. The earliest grape known; bunch and berry medium size; fine quality. Very hardy, robust and very productive; fine for all cold sections.

IVES. Black. Bunch and berry medium; compact. Very healthy, hardy, vigorous and productive. A successful market grape.

Croton-on-Hudson, N. Y.

The shipment of plants and trees arrived in perfect condition, thanks to better packing. The Abundance cherry is a fine specimen.

E. G. SALT.

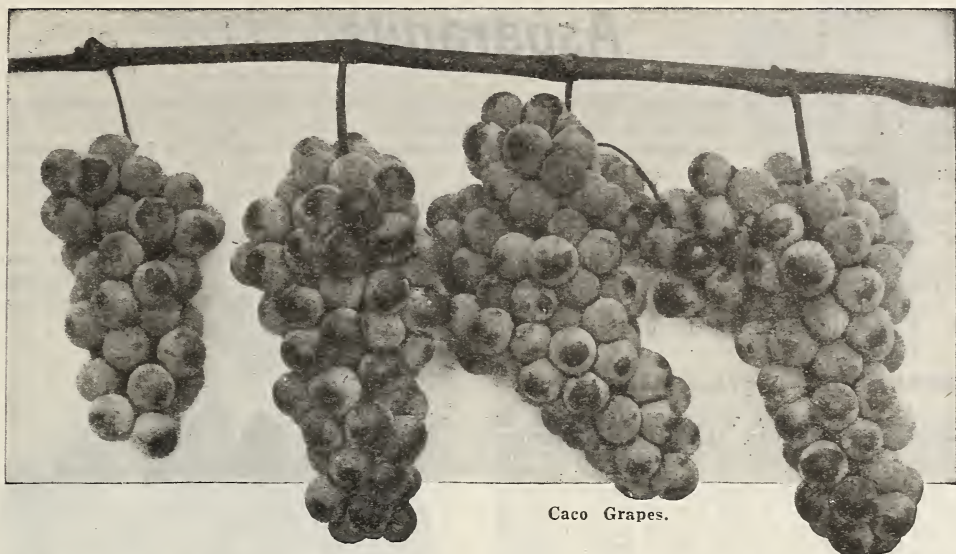

WORDEN. Black. This excellent grape is as hardy, healthy, vigorous and productive as Concord, better quality, sweeter, larger in bunch and berry, and several days earlier.

MOORE'S EARLY. Black. Bunch large, berry very large; equal to Concord in productiveness and quality but sweeter and 10 days earlier.

HERBERT. Black. Bunch and berry very large; flesh sweet, tender and of good quality. Early, hardy and productive; one of the best.

Green Mountain Grapes.

Caco Grapes.

Pink or Red Grapes

The Caco (Catawba Concord) Grape

The most delicious of all red grapes whether hardy or exotic, says the originator. A perfectly hardy grape that has been pronounced by America's greatest experts to equal in high quality and melting texture the finest grape grown under glass. In appearance the most beautiful of all hardy grapes. Berry very large, bright wine red; bunch of large size, compact and of good form. Ripens earlier than Concord, and is so rich in sugar it is fit for use two weeks before it is ripe. When one considers the price of the greenhouse products and realizes that the wonderful Caco can be grown in the back yard almost without attention, the force of the above statement is apparent.

LUCILE. A dark red grape that is sweet and of very best quality; in vigor, hardiness, and productiveness it is surpassed by none. Its beauty always sells it.

DELAWARE. The standard of excellence. Bunch and berry medium, compact, flesh juicy, very sweet and refreshing. Ripens before Concord. Vines hardy and productive.

White Grapes

GREEN MOUNTAIN. An extra early grape; skin very thin, tender and sweet; contains only one or two seeds; superb quality.

MOORE'S DIAMOND. Bunch and berry large; quality extra fine; strong healthy grower; very hardy, productive; fine for home or market.

NIAGARA. Very valuable for both garden and vineyard; bunch and berry large; skin thin; flesh tender and sweet.

POCKLINGTON. Beautiful golden color; bunch medium to large; berry large; flesh juicy, and of exceptionally fine flavor. Very hardy and productive.

Asparagus

No home garden is complete, and no housewife has justice done her unless provided with a bed of this excellent and most wholesome vegetable. What is more healthful or more appetizing than a dish of asparagus, coming as it does in early spring, when the appetite is craving something of this sort? One of the earliest vegetables. It is most beneficial in bladder and kidney troubles, very easily digested and very highly recommended by all physicians. When eaten freely it tones up the system, purifies the blood, drives away malaria and saves many a doctor's bill. A bed once established will give abundant supply for a generation; 200 to 300 roots will produce enough for an ordinary family, but 500 is better. You can cut it every day for months and it will come as fast as cut; easily grown anywhere and everywhere in the corner of the back yard, garden or along the fence or in any vacant spot. Every home should have its asparagus.

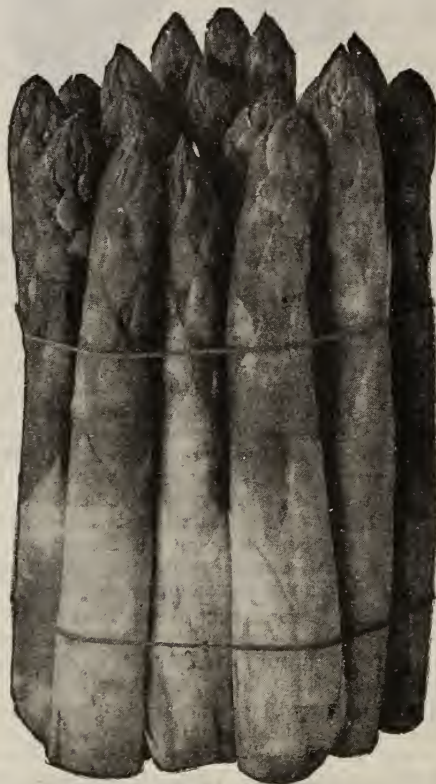

ASPARAGUS—A great Money Crop.

More than \$500,000 worth of Asparagus is shipped from Southern Illinois every spring. Great fortunes are being made here growing this early vegetable. It is no uncommon thing for the first shipments of asparagus to sell for \$12.00 to \$20.00 per bushel or at the rate of from \$300 to \$500 an acre. There is always a great demand for fine large asparagus in every home market. Why not grow asparagus and supply your local markets? Free cultural instructions furnished with each order for asparagus when requested.

MARTHA WASHINGTON. A New Rust-resistant Asparagus. This new pedigreed rust resistant variety was bred up by the United States Bureau of Plant Industry co-operating with the Massachusetts Agricultural Experimental Station covering a period of 14 years. The name Washington was applied because the original or first acceptable rust proof male plant was given that name. Stalks extra large in size, purple color, very tender, crisp, and extra fine flavored. Grows very fast and comes up thick on the rows; making it the most productive variety in existence. The heads stay very compact, solid and always bring a premium over any other variety. We have reduced the price so they will be in reach of all. We want every lover of fine delicious vegetables to try this wonderful well tested variety. Price, strong 2-year-old roots, doz., 75c; 100, \$2.00, postpaid. By express, not prepaid, 100 for \$1.75; 500 for \$7.50; 1000 for \$14.00. 1-year-old roots, doz., 50c; 100, \$1.30, postpaid. By express, not prepaid, 100 for \$1.15; 500 for \$5.00; 1000 for \$9.30. Write for price on large lots.

READING PURPLE GIANT. A remarkably strong growing and very valuable variety. It has such vigor that it gives shoots large enough for cutting in one year from planting, if planted in good soil and well cultivated. The shoots are of a decidedly purple color and are produced in great numbers from early till late—a season of 2 to 3 months. It is so valuable in every way it will be planted for market as well as the table more extensively as soon as it is better known. Price, strong 2-year-old roots, doz., 50c; 100 for \$1.50, postpaid. By express, not prepaid, 100 for \$1.25; 500 for \$5.50; 1000 for \$10.00.

NEW PERFECTION. This standard and popular variety is planted here in Southern Illinois very extensively. This is a great money-maker and at 3 years old has netted the growers \$500 an acre in 5 to 10 acre fields with ordinary cultivation. In short it has all the qualities demanded for the market and will prove itself to everyone who grows it to be true to its name—Perfection. It is deliciously tender, ex-

Martha Washington Asparagus.

tra large, very early, uniform, prolific, crisp and deep purple. Price, strong, 2-year-old roots, doz., 50c; 100, \$1.50; 1000, \$9.00.

Upper Alton, Ill., May 5th, 1923.
Gentlemen:—Have you asparagus yet? We had such good success with the ones we got from you before, we would like to have 5000 more. Will send our order just as soon as we hear from you. Thanking you for past favors, we remain as ever, FREDERICK BROS.

Horseradish Sets

It is as easy to grow as a weed, and every good housewife knows its great value in the making of sauces and seasonings. Once used in pickles it will never be left out. Horseradish sauce is one of the chief appetizers of the golden old-time Southern cuisine. It is also one of the few sauces or condiments that is pronounced by the best authority to be perfectly wholesome. A dozen plants will supply a large family for a lifetime, and it grows and multiplies very fast.

NEW BOHEMIAN. Roots very large, quick grower, very productive, producing about twice as much as the common sort. Flesh pure white, tender and free from stringiness. Three or four tons per acre can be produced easily. **Fine sets, 50c per doz.; \$1.50 per 100; \$12.00 per 1000.**

Adams' Improved Elderberry

A new fruit perfected from the common elderberry. The small white flowers come in large handsome clusters; very fragrant, handsome, opening in early summer when other flowers are scarce. Fruit black, very profuse, ripening in August. Grows 6 to 8 feet high. Berries are highly esteemed for pies, sauce, cordials and highly flavored wine, which is very refreshing. Everybody likes these improved elderberries; they are easy to grow and do well everywhere. **Price, 50c each; 3 for \$1.00; 6 for \$1.75.**

Paw Paws

(Winter Banana)

A small handsome tree with large purple flowers which are very fragrant, and large dark green foliage which makes it a handsome tree for the park or lawn. The large yellow fruit has the flavor and shape of the banana and is very delicious. Tree ornamental, hardy and productive; should be planted more extensively. **First class trees, 50c each; 3 for \$1.25.**

Adams' Improved Elderberry.

Persimmons

Persimmons are a great luxury to a large per cent of people, in which they can seldom indulge, but these large, delicious, improved varieties are a great improvement over the old native, pungent wild ones.

EGYPTIAN. Is very large, broadly oblong, pointed; skin light yellow, changing to deep yellow when at full maturity; flesh yellow; quality very fine, delicious, firm, juicy and good. Nothing tastes better in the fall of the year than a well ripened persimmon; trees bear at 2 years and are very hardy and productive. **4 to 5 foot trees, \$1.00 each, or 3 for \$2.75.**

West Dover, Pa., April 14, 1923.

The 300 quince trees and other stock arrived here the 10th and everything was in good shape. The quince trees were fine. The trees from last year are nice and green.

ED. DIETERICH.

Egyptian Persimmon.

"ONE TODAY IS WORTH TWO TOMORROWS." BETTER SEND US YOUR ORDER TODAY WHILE OUR STOCKS ARE COMPLETE.

Strawberries

Prices for strawberries during the past few years have been exceptionally high, selling for 25c to 50c a quart; netting the growers from \$500 to \$800 an acre with such varieties as **Cooper, World's Wonder, Extra Early and Extra Late Giant.** Strawberries will continue to pay for several years to come if the **Best Large** varieties are planted and grown. It has been demonstrated many times that it doesn't pay to grow such small fruiting berries as the Crescents, Warfields, Michael's Early, etc. The market demands nothing but fancy fruit and the consumers want nothing but the best that is on the market, they do not want inferior stuff even at a large discount, so why not plant varieties that the trade wants and are willing to pay fancy prices for.

Every Bradley Plant Sold Is Guaranteed to Be Freshly Dug From New Fields, grown for plants alone; grown on new ground that is especially adapted to the Strawberry.

New ground is, of course, one of the essential requirements for the propagation of strong, hardy plants, containing as it does all the necessary chemical elements in the proper proportion for the most perfect fertilization and consequent development of plant growth. We are very often asked why our plants have such heavy crowns and thick, long roots and are full of so much vitality. Here is the reason—we give our plants plenty of space so they will have plenty of room to develop themselves so they will reach full development and stand for the most productive power which will give an abundant crop of fruit.

OUR FOUR MONEY MAKING STRAWBERRIES

Plant some of each of the following Big Four Varieties of Strawberries and supply your table with fine, large, highly flavored berries from the very earliest to the very latest fresh ripe Strawberries for four to five weeks.

HALF YOUR LIVING WITHOUT MONEY COST

The question of cost of living is and has been a question that has come home to every one of us in recent years. Two years ago the high price of everything was the trouble. Now the trouble is lack of money to buy with even at much lower prices for the things we usually buy.

PREMIUM NO. 1.

Earliest to the latest, covering the entire season. Best for the family garden, best in quality and productiveness, the cream of over 400 varieties.

OUR BANK ACCOUNT STRAWBERRIES

Full cultural instructions furnished free with each order for plants, when requested

The Cooper

(See center color page)

The biggest and best strawberry ever introduced. This wonderful new strawberry originated in Southwestern Michigan by Mr. B. F. Cooper, who says in part: "I will swear to the truth." The following is his statement: "The Cooper is the one biggest and best strawberry without a fault. Never a berry with a sign of a core; never a berry that is hollow; never a green tip; a very bright red and flesh color."

Berries enormous in size; plenty of the berries are 5 to 6 inches around; 18 to 35 berries fill a quart box. The plants are very large and produce 6 to 8 fruit stems to a plant with 8 to 24 berries to a stem; each individual stem 2 to 3 inches long. For hill culture it is something wonderful; a single plant has 17 fruit stems with an average of 8 to 10 fruit stems with 16 to 24 berries each. We dug plants that filled a bushel basket and had roots over 20 inches long. They are great drought resistors that carry every berry to maturity. Large, long roots with a mass of feeders—the like was never seen on strawberries. Flavor and quality unsurpassed; we have never bit into anything so sweet and delicious; the more you eat the more you want, they leave a lingering taste that is never forgotten. Mr. Bronnell, a prominent grocer of Dowagiac, Mich., drove 9 miles and paid \$3.50 to \$4.00 per 16-quart case when he could get common berries delivered at \$2.00 per case.

Cooper is not only popular with the growers but is equally so with the buyers; there is no berry shipped on the market that sells for more money than does the Cooper. You will never regret planting Cooper. We have a very fine lot of plants to offer our customers that will soon be taken. We bought our first stock of plants direct from the introducers and have the genuine Cooper. Ripening directly after Extra Early Giant.

Cooper
Strawberries.

World's Wonder Strawberry.

The World's Wonder

(See center color page)

This is truly a wonderful strawberry. Season of ripening following Cooper. Berries extra large, deep red; strong, rank, thrifty grower; with a mass of long roots and is well adapted to any soil or climate, seem to do equally well North, South, East and West. It is wonderful as to productiveness, producing great clusters of large, well shaped berries that are very attractive and handsome.

Wherever World's Wonder has been planted it has become the great favorite as a show berry and brings the highest market price when common varieties go

THE WORLD'S WONDER STRAWBERRY—Con.

begging. The past season World's Wonder yielded at the rate of over 10,000 quarts per acre, netting the grower over \$2000. The large ripe berries almost lay in heaps and piles and pickers could easily pick a quart box heaping full without moving out of their tracks.

Our strongest endorsement cannot express our admiration for World's Wonder and we especially recommend them for the home garden as well as for commercial planting; we consider them a money maker and a mortgage lifter.

The commercial grower will find it highly profitable because its berries are large, firm; ship and carry extra well. It is one of the very best varieties for the home garden as its berries are so sweet, mild, delicious, firm and meaty that they are relished as dessert when served with little or no sugar.

Extra Early Giant

(See center color page)

Earliest of all, and decidedly the finest and best very early strawberry grown. This variety will bring you extra money on account of being extra early and extra large in size. Color brilliant scarlet crimson, conical with pointed tips, color all over at once, no green tips, have a very delightful aroma and very rich, mild flavor; very firm, sweet and delicious and red to the center; have large caps, hence exceptionally showy and very attractive. It is the largest and most productive extra early berry we have ever fruited. We always sell large lots of plants of this variety and have never had a single complaint, but hundreds of testimonials praising and re-ordering more plants of this grand, good, extra early berry.

Extra Late Giant Strawberry.

Extra Early Giant Strawberry.

Extra Late Giant

(See center color page)

One of the largest strawberries grown, ripening after all other varieties have gone. Mammoth in size, many of them measuring $4\frac{1}{2}$ to 6 inches around and hold their size well to the end of the season; surface smooth and glossy, bright flame color, meaty texture, very fine quality, mild, rich, sweet, with the flavor and aroma of the wild berry pronounced.

Productiveness—The vines are simply loaded with berries. One can hardly understand how the vines can produce such loads of large, well matured berries.

Size and Color—Berry extra large; a beautiful gloss red; the flesh of the berry is red clear through.

Quality—The flavor is as fine as can be found in any berry; a perfect table and canning berry and a berry which sells itself on any market. Succeeds upon almost any soil and under all conditions and is called the "Poor Man's Berry" and the "Rich Man's Berry."

FIRST STATE BANK.

Makanda, Ill., October 12, 1923.

To whom it may concern:

We have observed the manner in which Bradley Brothers have conducted their business and consider them as reliable nurserymen. They are growing very rapidly in the volume of business they handle, and their complaints are reduced to the minimum. Judging from the character of their growth and the manner in which they conduct their business, we would consider them worthy of your order.

O. A. OLDFIELD, Cashier.

J. H. Hale Peach

A wonderful Peach. See page 3.

Abundance Cherry

Everyone should have this Cherry. See page 10.

FIRST NATIONAL BANK.

Anna, Ill., October 12, 1923

To whom it may concern:

We have known the firm of Bradley Brothers of Makanda, Ill. for many years. They are financially responsible, honorable and reliable business men. You can make no mistake in giving them your order for nursery stock which is of the highest quality. ED. SAMPSON, Vice President.

World's Wonder

(See page 23)

This variety ripens just after the Cooper. It is truly a wonder—always bears a good crop every year under all conditions.

BIG FOUR COLLECTION

NO. 1. 100 plants each of these four best varieties, 400 plants, prepaid to your door, for \$5.00. With this collection you have ripe berries every day, from the very earliest to the very latest.
BIG FOUR COLLECTION NO. 2. 25 plants of each variety, 100 plants in all, for \$1.75, postpaid.

Cooper

(See page 23 for description)

This wonderful variety ripens just after Extra Early Giant. The largest yielder, best flavored—outsells any other variety on the market.

Extra Early Giant

(See page 24)

Earliest of all Strawberries; large fine flavored; a great money maker.

Extra Late Giant

(See page 24)

The latest variety known; fine flavored, good canner, the largest berry ever produced; brings big money, as it ripens after all others are gone.

One strong two-year-old plant of this grand new Rose given FREE with every order amounting to \$2.00 or more, if requested.

No more than one free Rose given any one customer.

Bradley's Beauty Rose

This picture shows a planting of Hydrangea, Spirea and Barberry. For a very small cost you can make your home as beautiful as this. We will be more than pleased to offer any suggestions along the line of making your home the most beautiful in your locality. Suggestions are free and without obligation on your part.

PREMIER (Kellogg's Premier). A very popular variety that is being extensively planted by large fruit growers over the country. Plants strong, vigorous growers, root deeply and indicate no preference as to soil or climate, thriving everywhere and withstanding drouth to a remarkable degree. Premier begin to ripen with the early varieties and continue for a long season. Size large to extra large; color bright red to the center, firm with very high quality. In productiveness it ranks among the highest. We have a very large stock of plants of this variety to offer.

Premier Strawberries.

DR. BURRILL. The new million dollar strawberry. This new berry is the biggest cropper of all strawberries. Berries are very large and uniform in size and shape. Most of you know what Senator Dunlap is. Dr. Burrill is a better berry in every way, produces more berries, bigger berries of better quality. Foliage is large, of a beautiful dark green and very hardy and healthy. With its extra long, strong roots, heavy crowns and healthy foliage, it is able to produce its wonderful crop of fruit every season. Berries are very dark red in color, extra solid and are of the very best quality for canning and home use, as well as one of our best shippers. We have grown a splendid stock of Dr. Burrill plants on new ground and plants are extra large and well rooted. The demand for Dr. Burrill plants will probably far exceed the supply the same as in the past and we advise ordering them early. Don't fail to include Dr. Burrill in your order this year, as they will bring you paying crops of large, extra quality berries. On account of the high color and fine appearance the fruit of Dr. Burrill sells at top prices. Dr. Burrill is a seedling of Senator Dunlap crossed with Crescent. It takes the beautiful, dark red color of the Senator Dunlap and resembles that grand variety very closely.

SENATOR DUNLAP. This is the leading strawberry throughout the United States and the demand for this variety has steadily increased every year since its introduction. It does very well everywhere and produces enormous crops of fine fruit regularly. Senator Dunlap has a perfect blossom, is hardy, productive, a splendid keeper and seems able to produce a good crop under any circumstances. Senator Dunlap is a very heavy bearer of good size, evenly shaped fruit of a very beautiful dark red color, and its flavor is delicious. For canning it is fine, making a rich, red syrup. It is a first class shipper and retains its brightness long after being picked. It looks well on the market and sells at top prices. The best proof we have that this berry is a big money maker is the fact that our customers in nearly every state in the Union are ordering Senator Dunlap in large quantities every year, often planting several acres. We guarantee Senator Dunlap to make you a good big profit.

AROMA. It is unquestionably the heaviest yielding and most profitable extra late variety yet introduced. The demand for Aroma plants is tremendous, there is never enough to supply the increasing demand. In matter of productiveness, quality, flavor and market value, the Aroma is so much superior to the other old standard late varieties, that we urge our customers to plant Aroma heavily and increase the profits by prolonging their berry season. There is mighty big money in growing late varieties as they come into bearing when the rush of the season is over and command big prices. Aroma does well wherever grown and bears a heavy crop regularly. We have never heard of a failure with Aroma. The plants are large and heavy crowned; ideal for hill culture, also for matted rows or other systems. Order Aroma. We will guarantee your satisfaction.

KLONDYKE (Improved). The standard berry for the southern and middle states; does fairly well in the north. Productive, brilliantly colored and so firm that on the northern markets it classes as a re-shipper. It commands top-notch prices.

MISSIONARY. A great favorite as an early berry for the Southern states, as well as on the western coast. Medium size, firm and uniform; a good shipper; sells well; a favorite with many growers.

Bradley's Pure Bred Everbearing Strawberries

For big, quick money, full crop of berries the same year you plant them, berries for the table, for canning, plant the Champion and New Perfection. The sensation of the present century.

Our Pure-Bred Everbearers begin fruiting the first year about three months after plants are set and continue to fruit heavily until checked by severe freezing. They are not injured by light frosts or light freezing. We have picked and served Everbearing Strawberries for Thanksgiving dinner and very often in December after the snow flies.

Our Pure-Bred Everbearers produce an enormous crop the same season the plants are set, which makes them highly desirable for the home garden as well as for home markets. The high prices the fall berries command makes them very profitable to grow in quantities for the market.

From letters and conversation with our customers, we conclude that the greatest human joy of the dinner table is the serving of strawberries—ripe, beautiful, cool and luscious; fresh picked from one's own plants. From early May until November, we have them in abundance; heaped high in the dish, drenched with cream, smothered in sugar, there is no pleasanter luxury on earth—unless it is another dish of Strawberries.

Full cultural instructions as to how to grow the Everbearing Strawberries furnished free with each order for plants when requested.

**World's
Champion.**

(See center
color page.)

THE WORLD'S CHAMPION—King of All Everbearers

Unsurpassed as to productiveness, strong, hardy and vigorous. GREAT FLASHING RED BEAUTIES; extra large, firm, exquisite, aromatic flavor, being very sweet and delicious. Bears all summer and fall until hard freezing; very often found in December under the snow uninjured. The most productive strawberry in all the world. The United States Department of Agriculture, Bureau of Plant Industry, Washington, D. C., has no record that has exceeded the following record from any one acre.

The following is the world's record as grown by the originator: "From one acre set to Champion, spring 1920, produced in 223 days 5623 quarts of berries that sold for \$2,059.20." This is the best record known

in the United States. There were 352 sixteen-quart cases picked from this acre in 129 days and from August 8th to August 15th, there were 688 quarts picked that sold for \$293.05, the average price obtained for this crop of one acre of Champion berries was \$5.85 per case. This record was made the same year the plants were set. We have found 275 berries on one plant and very often pick one quart from a single plant. 60 days after they are set out they are loaded with buds, bloom, green and ripe berries in all stages of development. You should by all means get started with this variety this spring; no matter how many other Everbearers you have planted you have never found anything to equal the Champion in productiveness, size, flavor and attractiveness.

New Perfection

(See center color page)

New Perfection won the \$1000 cash prize offered for the Everbearer proving the most perfect in every way, hence its name. It is unusually productive, of uniformly large, well formed berries of very rich red color, fine delicious flavor. New Perfection fruits regularly summer and fall; fine berries remaining under the dense foliage till November. This is an ideal variety for home use as they are so delicious and mild flavored that invalids unable to touch other fruits eat them with great benefit. During September, October and up into November the plants are loaded with green and ripe berries in great abundance, often 100 to 150 berries are on a single plant. The plants are large, strong, vigorous with large, long clusters of roots that enable the plants to mature their great loads of berries to perfection.

**Perfection
Everbearing
Strawberry.**

Standpat

"The Universal Everbearer." Standpat has become a great favorite everywhere. It produces big crops of extra large, glossy firm berries in all soils and climates. Standpat fruits regularly summer and fall; stands drought the best of any variety we have ever fruited. Plants large, strong and thrifty with a mass of long roots; stands the dry hot summers and the cold bleak winters alike. Admired and praised by growers everywhere. You cannot go wrong by planting largely to Standpats. One grower in New York writes, "Standpat stands head and shoulder above all others. We had buds, blooms, green and ripe berries on our vines all summer and fall, averaging 2 quarts to the plant."

The Big Strawberry without a fault.

Progressive

Is a persistent bearer, producing from the time other plants begin to bear in the spring until a very heavy frost in the fall. Has strong vigorous plants, and is very productive. Fruit of high quality, firm, delicious and sweet.

Progressive Strawberry.

Standpat Strawberry.

Everbearing Strawberry Garden

This garden will begin fruiting about 75 days after plants are set, producing an abundance of fresh delicious berries up until freezing weather. One can hardly estimate the pleasure and profit growing one of these gardens. It will supply your table with sweet, delicious berries fresh from your own vines all summer and fall. You and your family eat all you can and can and preserve all you can't eat and they will be mighty fine during the winter months when they can't be had from the vines.

Everbearing Strawberry Bargains

COLLECTION NO. 3. 100 plants each of Champion, Perfection, Standpat and Progressive prepaid to your door for \$9.00. This collection gives you the very best there is and at a great saving.

COLLECTION NO. 4. 25 plants each of the above varieties for \$2.75, delivered postpaid. If you want a small bed of everbearing berries you can save on this collection.

Bradley Brothers, Makanda, Ill.

Gentlemen:—Please send me a special price on 500 California Privet hedge. My dealings with Bradley Bros. have been a success and want to remark that the 300 everbearing strawberry plants received from you last April gave us 50 quarts of canned berries to eat this winter. These same berries helped to sell my property, so I am now living in South Bend, Ind., and as I haven't any shrubbery or shade, I want to get your catalogue for 1923, please. My old address was University Heights, R. F. D. Box 152-G, Indianapolis, Ind. My new address is

South Bend, Ind., Jan. 1st, 1923.

R. R. VAN LEW,

814 So. 10th St., South Bend, Ind

Dear Sirs:—Received shipment of fruit trees in good condition, I think the trees are fine and will order more next spring.

East Lynn, W. Va., April 11, 1923.

LUCIAN T. JONES.

Dear Sirs:—I received the cherry trees all O K and I thank you for same; they are very fine and I appreciate them very much. The other shipment of plants and trees are looking fine and I have taken great care of them. Thanking you again and hoping that I may be able to do you some good turn in the future, I remain,

Erie, Ill., April 25, 1923.

FRANK B. BUNN.

Bradley's Raspberries

Among the berries we consider the raspberry to be second only in importance to the strawberry. It should be grown in every family fruit garden. The fruit is very delicious and healthful and is greatly appreciated by almost every lover of fine fruits. It is fine for pies, canning, jellies, and jam. Surely no one will do without raspberries when they can be so easily had.

RASPBERRIES FOR EVERYONE—EVERYWHERE

Raspberries to can, to make into delicious preserves, jellies, jam—so good they will make the mouth of a mummy water; raspberries for all the children—for all the grown-ups—for every meal—when you just can't think of anything for dinner. You can grow them yourself on your own ground at little cost; you can have these fresh on your table from June till November by planting the Everbearing varieties.

Genuine Everbearing Raspberries

The Daintiest and Most Delicious of All Fruits

La France

Giant Everbearing Red Raspberry—Big, Rich, Sweet, Juicy Berries from July Until November.

The berries are twice the size of other raspberries, wonderfully delicious in flavor; firm; the size of the berry and its delicious flavor are the same from first to last. The late crops, when raspberries are scarce and therefore highly priced, are heavier than the earlier ones.

La France is a prodigious bearer throughout the season, from late June until all vegetation is killed by frost.

The bushes of this remarkable raspberry are rapid, vigorous growers, often reaching a height of nine feet. The canes are strong and erect, frequently an inch or more in diameter with practically no thorns. This makes berry picking comfortable. The canes branch freely adding greatly to their productivity.

The Fruit. The fruit is borne on racemes, one to three feet long in very large clusters and the same racemes show the unusual sight of buds, blooms, fruit just setting, green berries and the ripened fruit. This condition continues through the entire season.

A raspberry is really made up of a bunch of miniature berries, called "drupes" each "drupe" contains seed. The "drupes" of the La France Red Raspberries are more than three times the size of those in such favorites as the Cuthbert and the berry contains less than half as many "drupes," therefore the fruit contains fewer seed than all other berries.

The La France is all "meat;" all berry; not all seeds.

La France Red Raspberry fruits early in June, continuing throughout the growing season; after being established they will bear as early as June and as late as November last and later, so long as heavy frost has not killed all vegetation.

La France is perfectly hardy and has been thoroughly and successfully tested in various parts of the country.

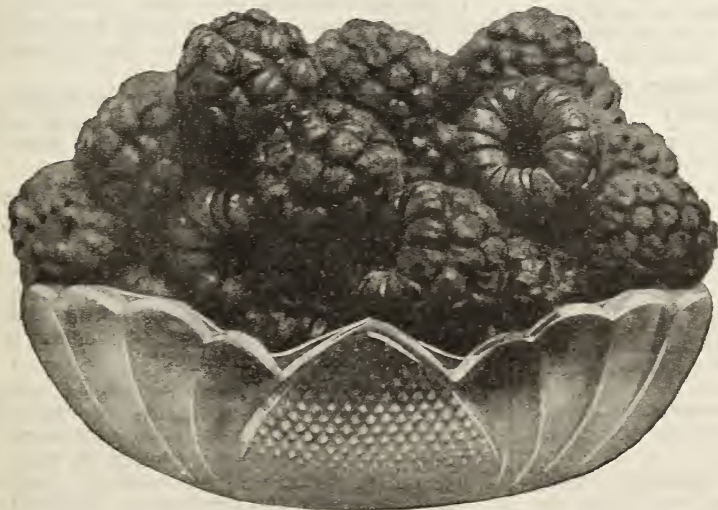

In the Northwest, the great berry growing section of America, growers are most enthusiastic over La France and are planting it heavily.

It is the best for home garden and a "GREAT MONEY MAKER FOR BERRY GROWERS."

LA FRANCE, Holds the World's Record.

Has been awarded the World's highest medal over all other RASPBERRIES.

Awarded Silver Medal by Tarrytown Horticultural Society also by the Connecticut Horticultural Society.

La France Everbearing Red Raspberries.

BRADLEY'S QUALITY IS KNOWN THE WORLD OVER.

Welch Honey Red Raspberries.

EVERBEARING RASPBERRIES—Continued.

Awarded Silver Medal by Horticultural Society of New York.

Awarded First Class Certificate of Merit by the Massachusetts Horticultural Society.

Awarded First Class Certificate of Merit by the following Societies:

Horticultural Society of New York; American Institute of New York; New York Florist Club; Nassau County Horticultural Society; Morris County Horticultural Society; Westchester Horticultural Society; Fairfield Horticultural Society and many others.

No other Raspberry approaches La France either in size, flavor, beauty or productiveness. Outyielding all other varieties.

THE FAVORITE OF THOSE WHO DEMAND THE WORLD'S BEST

The La France Red Raspberry is grown in the gardens of the estates whose owners are careful to have the World's Best, including the following noted men:

John D. Rockefeller, Pocantico Hills, N. Y.

Wm. Rockefeller, Tarrytown, N. Y.

J. P. Morgan, Glen Cove, L. I., N. Y.

P. S. DuPont, Wilmington, Del.

Chas. M. Schwab, Loretto, Penn.

William Ziegler, Jr., Noroton, Conn.

James J. Hill, Lake Geneva, Wis.

Henry Ford, Dearborn, Mich.

William Waldorf Astor, Newport, R. I.

And many others who require the finest only.

La France was put on the market by "John Scheepers," the introducers, who sold the plants at \$2.00 each and \$20.00 per doz. and

were all sold long before the season was over to Gardeners who had investigated the true merits of the berry.

We bought a large stock of La France direct from the introducers; we have a good stock of extra fine, well-rooted plants to offer at a very reasonable price for such a wonderful variety. We would advise early orders as our supply of plants will be all sold before the season is over and there are no available plants to be had; as the entire stock of plants is very limited.

La France will take the place of all other Red Raspberries and the demand for plants will be enormous as soon as they become better known.

We want EVERY one of our customers to give this wonderful Raspberry a trial and our word for it you will never have cause to regret your purchase.

We have made the price very low so they would be in the reach of all lovers of fine, delicious, Red Raspberries.

ST. REGIS. Another very early Everbearing Red Raspberry; very early, bright red color, fine flavor, and produces fruit from spring till fall. Fruit small to medium in size, firm and a good shipper.

WELCH (Honey). Red. So sweet and rich in flavor and is known as "Honey Raspberry." Berries large size, good bright crimson color and honey sweetness, melting and luscious; very fine quality. Canes vigorous, hardy and productive. Especially recommended for home use.

EVERBEARING RASPBERRIES—Con.

King of Cliffs Black Raspberry.

KING OF CLIFFS EVERBEARING BLACK RASPBERRY.

(See center color page.) The most wonderful black raspberry ever introduced. Extra large size; enormously productive. Another season has proven the "King of Cliffs" to be the earliest black raspberry grown; flavor very delicious, of honey sweetness, small soft seed, black glossy color, long season of ripening places it in a class unapproached and alone as an everbearing black raspberry. The "Earliest and the Latest" is truly a wonderful raspberry, extremely early, ripening before strawberries are gone. Canes of iron-clad hardness, enduring the severest cold uninjured. Large upright thrifty rank grower; wonderfully productive. Canes never affected by anthracnose or any other disease or fungus. Withstands the heat and drought of summer and the blizzards of winter better than any other variety. We especially recommend this excellent tried variety for table use as well as for market.

Here is what Mr. M. C. Webb, a prominent fruit grower says:

"I consider the King of Cliffs the best everbearing black raspberry ever produced for several reasons; the canes are very thrifty, hardy, enormously productive, free from disease and insect pests, the berries are extra large, glossy black color, firm, excellent flavor and the canes bear a large crop in June and another crop in the fall."

Mr. C. R. Modglin, Broker and Solicitor, says:

"The King of Cliffs excels all other black raspberries in productiveness that I have ever seen; larger than Cumberland, firm as

Kansas, ten days earlier than Palmer, Plum Farmer or Eureka. The fall crop is produced in large clusters that continue to ripen until freezing."

KING OF MARKET RED RASPBERRY.

The famous King of Market Red Raspberry is the largest red Raspberry we have ever tested with the exception of the La France. The berries are very showy and attractive in color, firm, sweet, juicy, with very small soft seeds. Bears very heavy crops spring, summer and fall. As a spring variety it has few equals as to large size of berries and productiveness; sells at a premium over other raspberries on the market. This variety is being planted in Southern Illinois more than any other variety. As an everbearer it has no equal. The vines in the fall are so laden with large, brilliant red berries, that they are bent to almost breaking in a rainbow shape, and they continue to bear until checked by hard freezing. There never was a better opportunity for the fruit growers to make big money growing raspberries than is offered now. As a raspberry for the family fruit garden it is hard to beat. We have been growing this variety now for several years and they have never failed to produce a large crop of fine berries during the fall months.

CUTHBERT. Red. The leading red raspberry, the standard main-crop variety. It is very productive of large, conical, rich crimson berries, and altogether it presents a very handsome appearance. The flavor is delicious and the fruit as a market berry and a shipper has no superior in red raspberries. The season is medium to late.

HONEYSWEET. Black. Berries extra large, glossy black, firm and remarkably rich, of honey flavored sweetness and very luscious; oblong in shape, very meaty, very small seed; flavor unsurpassed; hangs on the vine a long time. Berries are produced in great abundance; sells for a premium over any other variety. The fruit pulp surrounding the seed is full of thick, sweet juice; very little sugar is necessary in serving or canning.

BLACK DIAMOND. One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large, sweet and excellent.

PLUM FARMER. Has been thoroughly tested in western New York where it is a great favorite for market and home use. The fruit is very large, often measuring an inch in diameter. Brings the highest prices on the market.

CUMBERLAND. The business blackcap. It is of wonderful productiveness, producing regularly and uniformly very large crops. In size the fruit is simply enormous, far surpassing any other variety. The berries are seven-eighths and fifteen-sixteenths of an inch in diameter. In quality it is similar and fully equal to the Gregg. It is unusually firm and is well adapted for long shipments. It is an unusually strong grower, throwing up stout, stocky canes, well adapted for supporting their loads of large fruit.

For an order amounting to two dollars or more we will give Free 1 Hubbard grape or 1 Bradley's Beauty rose. Be sure to state on the order sheet which you want.

Olive Branch, Miss., Dec. 6, 1922.

Dear Sirs:—The trees and berries received in good shape, they are nice and all well rooted; put them out day received, had the ground in fine shape the day before and had a nice shower on them the night after I got them out. The strawberries look so green and fresh I think we will have berries for dinner next Sunday. The peach trees are so well rooted I am sure they will do well. I am pleased with the shipment and thank you for your promptness in filling the order. Should opportunity afford it will be a pleasure to do anything I can for you in my locality.

A. Y. SIVLEY.

Blackberries a Profitable Crop

Blackberries are among the best known and most valued of our berries. No fruit of any kind is more wholesome. A liberal use of berries and other fruit will save doctor's bills. Blackberries should be planted in every home garden; as a money-maker they cannot be beaten; they are easily grown and succeed on any and all the different kinds of soil.

Ambrosia Blackberry

The earliest blackberry in cultivation, ripening 10 days before the Early Harvest, earlier than any dewberry; ripening with the earliest raspberries and before all of the strawberries are gone. Berries extra large, long, meaty, sweet, mild, of exquisite flavor and surpassing quality; rich in sugar and free from the bitter taste contained in most blackberries; firm texture; compact and free from any hard core; seed small and so soft that the whole berry melts in one's mouth while eating. Berries hang in large, long clusters more like grapes, easily picked, do not scald, rust or blight, and hold their large size through entire season. Berries very attractive and fine for the table, pies, jelly, jam, and blackberry juice. Canes are absolutely always and everywhere hardy, thrifty and enormously productive, producing 250 cases of 24 quarts per acre; sold in Chicago for \$8 per case on account of extreme earliness, fine flavor, large size and fine appearance.

WHAT OTHERS SAY ABOUT THE AMBROSIA BLACKBERRIES

The Ambrosia Blackberry is the largest, earliest and best flavored blackberry I have ever seen or tasted. I think it is the best money-making blackberry on the market; I am so favorably impressed with this wonderful extra early berry that I am going to plant 500 plants regardless of price. —H. W. Beecher, of Illinois.

The Ambrosia is the largest extra early blackberry I have ever seen. Berries hang in large long clusters, very productive and hardy. —H. A. RODMAN, Fruit Broker, of Perry Co., Ill.

Ambrosia Blackberry ripens before Gandy strawberries are gone. Berries twice the size of Early Harvest, more productive, better flavor and ten days earlier. —HARRY R. ROW, Fruit Grower.

If I were growing blackberries for market, home consumption, as a money maker, I would grow the Ambrosia exclusively. They ripen extremely early, are very productive, of large size, easy to pick, jet black color and very hardy. —C. R. MODG-LIN, Dealer in Fruits.

Ambrosia Blackberries.

BLOWERS. This is one of the most remarkable new fruits ever produced. One single bush has been known to have produced 2,694 berries. It has the longest fruiting season of any blackberry, lasting from July to October, producing its greatest crop in August, and much in September. It is very attractive for market both on account of its size and its excellent appearance. Usually sells at from one to two cents a quart higher than other kinds.

EARLY HARVEST. Anyone with a good local market will find this variety very profitable as it bears early and over a long season. The fruit is medium size, good quality, of very sweet, delicious flavor. The canes are strong, healthy, upright growers, and produce an enormous amount of fruit. You will find Early Harvest a good dependable variety and much better than a lot of other varieties.

FREE. 1 Hubbard Grape or 1 Bradley's Beauty rose, with an order amounting to two dollars or more. Be sure to state which you want on the order sheet.

Cory Thornless Blackberry

The World's Greatest Blackberry Wonder

Smooth as a grapevine. As early as Ambrosia, the earliest blackberry in cultivation. Mammoth in size, many measuring 3 inches in length. The greatest home garden, market and commercial crop in the United States. Nothing approaches it in size, beauty, fine flavor and productiveness. Will add millions to the fruit growers over the entire world.

Blackberries are a great favorite fruit among fruit growers and gardeners; the greatest objection in growing the blackberry is the sharp thorns that puncture the hands while picking the berries and working among and handling the vines, with this objection eliminated the picking of blackberries is delightful and a pleasure; we have all of these objections removed in the Cory Thornless, absolutely thornless and as smooth as a grapevine.

This wonderful blackberry was first discovered growing in the mountain passes near the snow line near Jamestown, California; it is now being grown very easily picked off the vine. On account of growing district of California and is gaining in popularity wherever grown and far surpassing all other varieties.

Cory Thornless produces a good crop the first year after being planted, and is full bearing the second year. A field once established will increase in productiveness and last many years where they are cared for properly. They ripen with Ambrosia blackberry, right with the strawberries and before the earliest dewberries.

The berries are the largest of any known blackberry, measuring $1\frac{1}{2}$ to 3 inches in length and grow in great clusters, and are very easily picked off the vines. On account of the extra large berries, great clusters of fruit, and thornless vines one can pick many times more quarts than they can of any other blackberry.

Productive. Cory Thornless will far outyield any other blackberry grown, having produced 7 tons of fruit per acre. One plant has produced 25 to 30 pounds of fruit. They will produce 400 to 600 24-quart crates to the acre.

Quality. The sweetest, juiciest, highest flavored and finest quality berry we have ever tasted. Very few people eat dewberries or blackberries on account of the irritating quality of the seeds and the acidity of the fruit,

Cory Thornless Blackberries.

except two or three of the first pickings. They will continue to eat the Cory Thornless just as long as there are berries on the vines because they are nearly seedless, and because of the very pleasing quality of the fruit. Wine made of the berry is just simply delicious.

The seemingly high price of plants should not discourage people from planting this variety when the great yield is taken into consideration. One plant of the Cory Thornless will yield three to four times as much fruit as nearly any other blackberry.

The Cory Thornless increase from root cuttings like other blackberries and from tips like the black raspberry. From a dozen plants you can soon have enough plants to set an acre. We want every one of our customers

to try at least a dozen Cory Thornless as they will prove to be the greatest boon you have ever had. They do well anywhere and everywhere if carefully cultivated.

Eldorado Blackberries.

MERSEREAU. Remarkably strong grower, upright, producing stout, stocky canes. Claimed to be the hardiest blackberry, standing uninjured 20 degrees below zero without protection. An enormous producer of extra-size berries, which are brilliant black and retain their color; extra quality; sweet, rich, melting, no core.

HOCO (Honey Coreless). The giant of all blackberries. Berries extra large in size, $1\frac{1}{2}$ to 2 inches long and as large as a man's thumb. Enormously productive, producing at the rate of 8,500 quarts to the acre; begin to ripen medium early and continue over a long period of time; berries of the finest flavor, sweet, juicy, delicious and almost coreless, hence its name. As a fresh fruit from the vine to the table it is a berry de luxe. For cooking it is superior to other blackberries, as it contains much less acid than even the Loganberry, making it possible to make luscious jams, preserves and jellies with much less sugar than any other blackberry. We consider the Hoco the finest flavored, heaviest cropping, best appearing berry ever grown.

TEXAS EVERBEARING BLACKBERRY.

First introduced by Mr. Texas, who brought it from South Africa. This is the greatest acquisition of the day. One grower claims he has picked 108 quarts from a dozen plants. The fruit is borne in enormous clusters, with a long fruiting season. The fruit is firm, melting, sweet and fine for shortcake, dessert, jam, jellies and preserving and almost as large as English walnuts. Canes very hardy, thrifty and an upright grower; seem to do well everywhere and on any kind of soil. These berries are becoming very popular everywhere. Everybody likes them and those who have them want more. Should be planted on every farm and in every garden.

ELDORADO. The vines are very hardy and vigorous, enduring the winters of the far northwest without injury, and their yield is enormous. The berries are large, jet-black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired. Perhaps the most valuable sort in cultivation.

WARD. This is a vigorous grower and gives large annual crops of beautiful large berries. The fruit is black throughout, firm and good for shipment, yet tender and melting and of the best quality. This is more largely grown than any other variety. The plant is rust-resistant, and

Hoco Blackberries.

the berries are almost wholly without a core. Midseason.

Book of Instructions sent free if you ask for it.

Blackberry Collections

COLLECTION NO. 1. Blackberries all season from earliest to latest. 3 strong plants each of the above 9 varieties, sent postpaid for **\$2.85**

Illinois Pecans.

Northern Grown Nut Trees

The constant and growing demand for nuts, and the immense quantities of them yearly imported to meet it has greatly stimulated the planting of nut-bearing trees. The nut kernels are so palatable and wholesome that they should become a staple article of food here as well as in Europe. For the home garden the nut tree supplies shade and food besides adding value to the property as few other trees do.

Pecans

ILLINOIS PECAN. Originated near Ware, Ill. The parent tree measures 6 feet in circumference, is 50 feet high, with a 300-foot spread, and has produced 528 lbs. of nuts in a single season which sold for 30c per lb., wholesale. An acre of such pecans is worth \$800 to \$1200 annually to the owners. The nuts are very large, thin shell, easy crackers, crisp and very fine flavored. Nuts in clusters of 5 to 6 each. Tree early and abundant yielder and has never missed a crop. **Price, 3 to 4 foot trees, \$1.50; 6 for \$8.00; per dozen, \$15.00.**

INDIANA PECAN. The nut is very large, shell soft, kernel full and of excellent quality. Clusters of 4 to 5 each. Tree is the greatest bearer of any pecan tree we have ever seen, and very desirable for any purpose. **Price, 3 to 4 foot trees, \$1.25 each; 6 for \$7.00; dozen for \$12.00.**

Filberts

Filberts are easy to grow, in fact, can be grown far easier than potatoes or wheat. They are perfectly hardy and will struggle along in spite of neglect. They bear early and abundantly. Every city and country home should have some of these trees. **Price, 2 to 3 foot trees, 50c; 6 for \$2.75; doz. \$5.00.**

American or Black Walnut

There is great money growing the improved varieties of black walnuts. It does not require a very large tree to produce a bushel of nuts. Large trees may bear 8 to 10 bushels. One bushel will produce 10 pounds of meat and with the improved nut crackers one can get the kernels out in halves which sell on the market for 80c per pound.

ILLINOIS WALNUT. Originated in Illinois. Nuts are very large; shell thin; kernel full and of very fine quality. When cracked with a hammer is very easily removed in halves. Tree very thrifty, hardy; productive, often bears in 2 years and makes a fine lawn tree. **Price, 3 to 4 feet, \$1.25; 6 for \$7.00.**

THOMAS WALNUT. Originated in Illinois. One of the finest varieties ever produced. Nuts are very large; kernel large and full, of excellent quality. Trees begin to bear when very young; enormously productive; thrifty and hardy as an oak. They make a fine park or lawn tree. **Price, 3 to 4 feet, \$1.25; 6 for \$7.00.**

Hickory or Shellbark

Kernel full and plump; sweet and very delicious; tree vigorous grower and grows into a beautiful specimen; quite attractive for lawn or street planting. Bears abundantly. **2 to 3 ft., \$2.50; 3 for \$7.00.**

Franquette
English Walnut.

English or Persian Walnut

English Walnuts were imported from Europe and are growing west of the Rocky Mountains in very large quantities. Are now being planted with as much success in the middle and eastern states when they are budded or grafted on our hardy walnuts.

FRANQUETTE. Tree very hardy, thrifty and productive. The nuts command the highest price in the market and are the finest flavored and the best for one's use. Nuts very large, oval and very attractive; kernel full, sweet, with a very rich nutty flavor. Blooms late in the spring and escapes the frost. **Price, 2 to 3 foot trees, \$1.25; 6 for \$7.00; 3 to 4 foot trees, \$1.50; 6 for \$8.00; doz. for \$15.00.**

MAYETTE. This ranks with the Franquette as one of the leading varieties. Nuts quite large, smooth and of attractive appearance. Kernel large, plump, crisp, and of excellent flavor. Tree hardy and abundant bearer; starts late in the spring. **Price same as Franquette.**

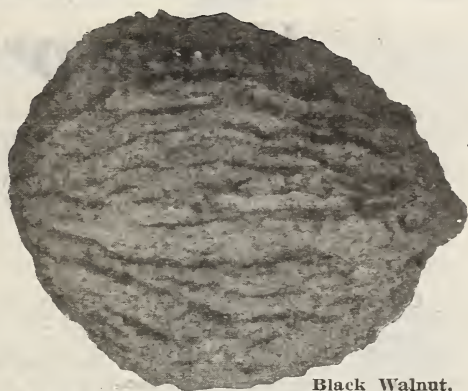

Note: English Walnuts will grow anywhere the apple grows successfully when budded or grafted on the hardy native walnuts. We use nothing else.

Butternut

Produces large, handsome, elongated nuts with rich, sweet, oily kernel, very nutritious. Tree grows rapidly and produces large crops in a few years. At present the supply is insufficient for the demands of a single city market. Butternuts, like black walnuts, are among the easiest nuts to produce. The trees bear transplanting well and are objects of great beauty, particularly when filled with nuts, which grow in clusters. **Price, 3 to 4 foot trees, \$1.25; 6 for \$7.00; doz. for \$12.**

Butternut.

Black Walnut.

Wagner's Hybrid Black Walnut

The Most Valuable Hardwood Timber Tree

The fastest growing hardwood tree known; a most beautiful shade and ornamental tree as well. The new walnut is bound to be the most profitable tree to possess.

Growth. Specimens have grown in seven years from seed to trees two feet thick four feet from the ground, 20 to 30 feet high.

Ornamental. As a shade or ornamental tree it cannot be surpassed, being dense, symmetrical, beautiful in foliage and outline.

Timber. The wood of this walnut takes a fine polish, superior to any other timber. The wood is so dense and heavy that a dry polished slab of it will sink in water like a slab of marble.

A Tree of Fortune. This tree can be propagated only from its nuts. These are sure to be so valuable in the future that a crop of nuts will bring from five hundred to a thousand dollars each per tree when it reaches bearing size in five to ten years.

Its Merits are already recognized and it is going to be the most eagerly sought for of all trees for forest, shade and timber planting. **Price, 3 to 4 ft., \$3.00; 2 for \$5.00.**

Almond

HARD SHELL. Hardy with large, plump kernel, very beautiful when in bloom. **3 to 4 ft., \$1.25.**

SOFT SHELL. Nuts preferable to the hardshell, tree not quite as hardy. **3 to 4 ft., \$1.50.**

Mayette
English Walnut.

Hedge or Living Fence

Grow a perfect hedge as quick as a hill of beans. Yes, just as quick. Plant this spring and before July, there, as if by magic, stands your hedge. Three months of growing makes it instead of three years. With more time the hedge can be grown to any height up to 10 feet, if desired as a windbreak, to give privacy to back yards, etc. Most hedges are thin along the bottom; ours are as solid as a brick wall.

California Privet

One of the leading hedge plants and undoubtedly the largest planted of them all; its foliage produces abundantly the deepest, richest green, almost an evergreen; does not shed its foliage until late winter and then only in an exposed position. Very hardy, easily and quickly pruned, you may shape it in any position desired by trimming. They should be planted $1\frac{1}{2}$ inches deeper than they stood in the nursery row; where you set it dig about 12 inches deep and 12 inches wide, use some stable manure at the roots (do not use any commercial fertilizer), set the plants 6 inches apart in the row, dip the roots in water before planting; after plants are set cut them down to 4 inches from the surface of the ground; this will cause a thick new growth to start, and is very essential for a beautiful hedge; do not cut back again until they have made 10 inches of new growth; when cutting each time allow about 1 to 2 inches above where it was cut before until you get the height desired. After planting spread barnyard manure at surface of ground; keep free from weeds the first two years, by this time it will get its start, then nature will do the rest. Did you ever realize what an admirable and luxuriant privet hedge you could secure at a very small cost, and how much it would add to the value of your property? To find the exact number wanted, measure the space where it is to be planted and multiply the number of feet by two, this will give the exact number. Our privet is strictly first class, well branched and heavy rooted. Can be successfully set any month in the year that the soil is not frozen, except June, July and August.

18 to 24 inches, 10 for \$5c; 100 for \$5.50; 1000 for \$50.00.

5 to 30 sold at the 10 rate; 30 to 300 sold at the 100 rate; 300 or more sold at the 1000 rate.

AMOR RIVER PRIVET (North). The best for hedges in the north; has stood 20 degrees below zero uninjured; upright grow-

California Privet Hedge.

er; foliage similar to California Privet. Where a stiff, upright hedge is wanted nothing surpasses the Amor. To add to its attractiveness in foliage, it bears erect panicles of beautiful white flowers in June followed by black berries. 2-year strong plants, well branched, 12 to 18 inches, 10 for \$1.25; 100 for \$7.00; 18 to 24 inches, 10 for \$1.75; 100 for \$9.00.

DWARF BARBERRY (*Berberis Thunbergii*). Very attractive, neat and dense in growth yet graceful because of its drooping branches. It produces yellow flowers in the summer which are followed by scarlet fruit, borne in dense profusion on the long stems and clinging throughout most of the winter. The leaves color to scarlet and gold. This is a very attractive shrub for planting as single specimens on or about the lawn, or for planting in the corners near the house or porch or along the base of the wall to take away the bleak, barren effect of the wall. Dwarf Barberry is also used extensively for planting in borders in connection with other shrubs, for owing to its dwarfish habit, if planted in front of other shrubs, it takes away any ragged effect, making only a mass of green visible to the eye. It is also used extensively for planting in the corners where side-walks meet. For a hedge not over $1\frac{1}{2}$ to 2 feet high this is very desirable. We highly recommend it. Dwarf Barberry is not subject to rust. It is immune. 12 to 18 inches, 25c each; 10 for \$2.00; 100 for \$15.00, for extra well rooted plants.

Cultural Instructions sent free for asking.

Barberry Hedge.

BRADLEY'S QUALITY IS KNOWN THE WORLD OVER.

Hardy Flowering Shrubs

They are absolutely hardy and once planted, last indefinitely, increasing in size and beauty year after year and lasting a lifetime. They supply that something which is lacking in every yard where hardy shrubbery is not planted. We recommend a liberal planting of this class of plants; they increase the value of the property, make the home more attractive—life worth living—giving satisfaction and contentment that nothing else can.

Every man's heart has a place for the old-fashioned flowering shrubs, and some of the new fashioned ones are even more enticing. No home makes quite a home-picture without them. They complete and blend all the other parts of the composition, making a unity of trees, evergreens and flowers.

BUDDLEIA (Butterfly Bush). Bears large spikes of flowers similar to lilacs, in great abundance all summer. 2 ft., 40c; 10 for \$3.50.

CALYCANTHUS (Allspice or Sweet Shrub). It blooms abundantly in June and at intervals through the summer. Has rare and peculiar fragrance of wood and flowers. 2 to 3 ft., 35c.

Althea—Rose of Sharon.

HIBISCUS (Althea or Rose of Sharon). Blooms late in summer when flowers are very scarce. It bears abundantly, large, double flowers similar to the hollyhock. We have them in white, red, pink, purple and all double. 2 to 3 ft., 40c; one of each, 5 colors for \$1.75.

HYPERICUM (St. John's Wort). A small shrub bearing large, yellow flowers in great abundance during most of the summer. Very fine. 12 to 18 inches, 50c.

HARDY HYDRANGEA (Paniculata Grandiflora). It beats the world; fine shrub growing from 8 to 10 feet high. It is

Buddleia—Butterfly Bush.

hardy, enduring the severest winters outdoors without protection. Easily transplanted, not one in a thousand dying. Never fails to bloom the first year planted; blooms in great profusion; flowers as large as the head of a full grown child. It is thus attractive immediately after it is planted; gaining in beauty and grandeur for ten to twenty years if properly pruned. 1-year, 50c; 2-year, extra large, 75c.

HYDRANGEA ARBORESCENS (Hills of Snow). Hardy bush; begin to bloom in June and continue through August. Plant attains a height of 6 feet. Grows with nearly the same breadth with large trusses of dazzling whiteness, rendering this plant a peerless beauty. 1-year plant, 50c; 2-year, 75c.

LONICERA. *Fragrantissima* (Honeysuckle). The upright-growing honeysuckles are valued for their bright and fragrant flowers and showy berries. Fine for specimen plants or hedges; very hardy. 2 to 3 ft., 40c; 10 for \$3.50.

Morrowii. Strong upright grower, creamy white flowers followed by deep red berries which ornament the bush until autumn. 40c each; 10 for \$3.50.

Hydrangea Paniculata.

A FEW DOLLARS SPENT FOR ORNAMENTALS WILL ADD DIGNITY, LOVELINESS AND VALUE TO YOUR HOME.

Deutzia, Pride of Rochester.

LILAC, Purple. Old-fashioned sweet-scented purple lilac of our childhood. Their fragrance should bless every home and fasten the memory to the scene we knew as children. 40c each; 10 for \$3.50.

White. Same as the above except the flowers are white. Same price.

Japonica (Japan Tree). Largest lilac known; produces large panicles of creamy white; very fragrant. 2 to 3 ft., 75c.

LILACS—New French Varieties

We have the following varieties that we can furnish in the 2 to 3 ft. size for 75c each; 10 for \$6.50.

JOSIKAEA. Single purple.

CHAS. DIX. Purple-red.

ALPHONSE LAVALLE. Blue shaded violet.

EMILE LEMOINE. Double pink.

LUDWIG SPAETH. Dark purplish red.

RUBRA de MARLEY. Reddish purple.

The same varieties in tree form, 3 to 4 ft., \$1.00.

HARDY FLOWERING SHRUBS—Continued.

TAMARIX, Africana. Strong, slender growing shrub, with feathery foliage and small delicate pink flowers, borne profusely on graceful drooping branches which have red bark. 2 to 3 ft., 25c; 10 for \$2.00. 3 to 4 ft., 35c.

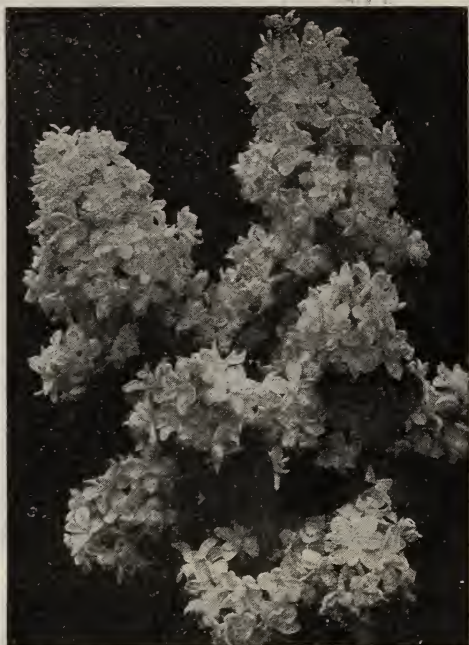

Gallica. Foliage fine and feathery. On long slender branches that are covered their entire length with bright pink, plume-like flowers. Same price as above.

DEUTZIA, Pride of Rochester. Large double white flowers, produced in great profusion through June. 2 to 3 ft., 30c; 10 for \$2.50.

Gracilis. A charming dwarf variety. Yields a mass of pure white flowers about Decoration Day. 15 to 18 in., 40c; 10 for \$3.50.

WEIGELA, Candida. Flowers pure white; produced in great profusion in June; also more or less all summer. 2 to 3 ft., 40c; 10 for \$3.50.

Eva Rathke. Flowers brilliant crimson. Very fine; blooms all summer. 2 to 3 ft., 75c; 10 for \$6.50.

Purple Lilac.

Weigela Eva Rathke.

HARDY FLOWERING SHRUBS—Con.

SPIREA. Comprising a large family of low shrubs; very hardy and of easiest culture; very satisfactory ornamental shrub.

Anthony Waterer. Has large heads of dark crimson flowers, blooming all summer. 15 to 18 in., 50c; 10 for \$4.50.

Billiardii. Produce rose colored flowers in great abundance nearly all summer long. Should be in every collection of shrubbery. 2 to 3 ft., 30c; 10 for \$2.50.

Van Houttei. White Queen. A well known spirea, a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom; the foliage hardly showing. It is of a drooping habit, reaching a height of 6 to 8 feet when matured, producing a profusion of white flowers in June. 18 to 24 in., 25c; 10 for \$2.00; 2 to 3 ft., 35c; 10 for \$3.00.

Prunifolia (Bridal Wreath). Bush covered with pure white double, daisy-like flowers in great masses in May and June. 2 to 3 ft., 60c; 10 for \$5.00.

MOCK ORANGE. *Grandiflora* (*Philadelphus*, *Syringa*). One of the most vigorous shrubs having large, snow-white fragrant flowers in great abundance. 2 to 3 ft., 40c; 10 for \$3.50.

Bouquet Blanc. A real white bouquet of immense size; we urge you to include it with your order; we know you will not be disappointed, because it has no equal anywhere. They have to be seen to be fully appreciated. 2 to 3 ft., 60c.

VIBURNUM. *Sterile* (*Snowball*). One of the best known old shrubs, bearing large balls of beautiful, snow-white flowers in June. The old-fashioned *Snowball*. Perfectly hardy. 2 to 3 ft., 50c each; 3 to 4 ft., 75c each.

Plicatum (*Japanese Snowball*). A very popular shrub. An upright grower, with fine, dark, crimped foliage and densely covered with large balls of pure white flowers in June. 2 to 3 ft., 75c each; 3 to 4 ft., \$1.00 each.

Philadelphus Mock Orange.

FORSYTHIA (*Fortune's Golden Bell*). Blooms early in spring before the leaves appear. Flowers golden yellow, often with twisted petals. One of the best hardy early flowering shrubs. 2 to 3 ft., 40c; 10 for \$3.50.

RED SNOWBERRY. A graceful growing shrub, most conspicuous in the fall when its branches, clustered full of bright, red berries, droop to the ground with their weight. Thrives in densely shaded situations. 2-year size, 30c, or 4 for \$1.00.

Book of Instructions sent free if you want it.

Viburnum Sterile—Snowball.

Spirea Van Houttei.

Our Hardy Roses

Hardy, Garden Roses, Queen of Flowers, Bloom the First Year Planted.

The demand for hardy 2-year-old roses has reached enormous proportions, for the reason they yield an enormous lot of blooms the first year they are planted. They are sure to live and grow right off, when they are properly pruned back for planting.

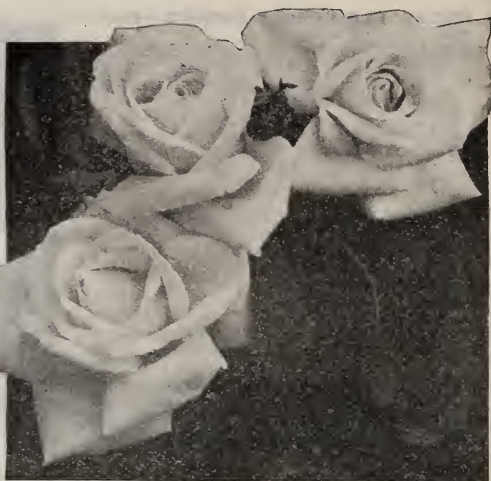

We properly prune all roses we send out unless we are otherwise instructed: the average planter does not know just how these 2-year-old roses should be cut back and pruned for the best results.

Our roses combine hardiness, vigor of growth and size of flower; they are very popular, hardy and the most useful of all roses. Everybody likes roses, and you should have an abundance of them growing on your premises.

SPECIAL NEW VARIETIES OF GREAT MERIT

Price, 85c each; 4 for \$3.00; doz., \$8.00, except where otherwise noted.

BRADLEY'S BEAUTY. This is our newest rose, this season being the first time it has ever been offered for sale. We have given many of them away to friends, and we now offer one free to every one of our customers who sends us an order for two dollars or more this season. This rose is without doubt the most beautiful rose ever produced. It is a large, full flower with well-shaped buds, the color being an attractive

Frau Karl Druschki.

glowing crimson; sweetly scented. A strong grower, making long stems suitable for cutting. We recommend this rose very highly for anyone growing roses for show purposes as the flowers are firm and hold up well when cut. Its size is nothing short of marvelous; the long, heavy, pointed buds are perfection, while the open flower, with its huge saucer-shaped petals, is glorious. When in addition the fact is considered that its blooms are produced with great profusion from early spring till freezing weather, it leaves nothing to be desired. No matter how many roses you have, you have nothing like the Bradley's Beauty. **Price of 2-year-old size, \$1.00 each. No more than three sold to any one customer.**

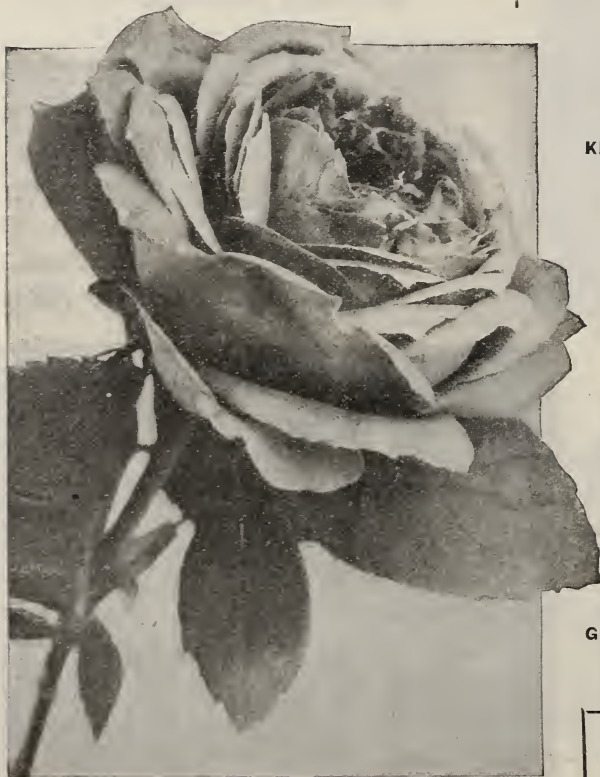

KING GEORGE V. Color rich, blackish crimson, deep, velvety and brilliant. Very free flowering and perpetual. The perfume is strong and very pleasing. Awarded the Gold Medal of the Festival of Empire, Crystal Palace, London.

GEO. DICKSON BLACK BEAUTY. Color a velvety-black crimson, full and very large. We have had blooms all summer, 5 inches across, with wonderful lasting qualities. Awarded the Gold Medal of National Rose Society of England.

ROSA HUGONIS. Yellow. Has been known to bloom during a snow storm. When in bloom the whole plant is covered with bright, shiny yellow blooms and buds, making a wonderful show. Its flowers sell for more than any other rose.

FRAU KARL DRUSCHKI (White American Beauty). Pure white; large, long buds; perfectly double, often measuring 5 inches across. A strong, hardy, thrifty grower, beginning to bloom in June and very conspicuous all summer.

GEORGE AHREND'S (Pink American Beauty). The growth and make-up of this rose is superb; while the delicate pink color is unapproached; you will need this rose in your collection.

George Ahrends—Pink American Beauty.

Scotia, N. Y., May 7, 1923.

Received plants O. K., many thanks for extras.

MRS. MABLE ZIEGLER.

BRADLEY'S QUALITY IS KNOWN THE WORLD OVER.

Best Hardy Outdoor Roses

Vigorous Summer Blooming Roses, Noted For Delightful Fragrance; Flowers Large and Lasting; Colors Intense and Striking

Book of instructions sent free if you want it.

GENERAL JACQUEMINOT. Bright, shining crimson, rich and velvety; exceedingly brilliant, handsome and fragrant. Useful for all purposes.

AMERICAN BEAUTY. Rich, rosy crimson, exquisitely shaded; a superb rose.

ANNA DE DIESBACH. Beautiful carmine; very large and fragrant; pointed buds; one of the best.

HUGH DICKSON. Intense brilliant crimson, shaded scarlet; large, full and high pointed center; very fragrant; the best in color of its class.

J. B. CLARK. Very deep scarlet; heavily shaded blackish crimson; very vigorous.

LOUIS VAN HOUTTE. Fiery red, bordered and shaded with blush crimson; large full flower; very beautiful and free blooming.

American Legion.

MADAME PLANTIER. Pure white flowers, produced in great abundance early in the season; very double.

MAGNA CHARTA. Bright rose; very large, sweet-scented and of fine texture; a vigorous grower and profuse bloomer. Very hardy.

PAUL NEYRON. Largest of all roses; deep rose; full and double; fine foliage.

PRINCE CAMILLE DE ROHAN. Deep, velvety crimson. A large flower and profuse bloomer of beautiful color.

VICK'S CAPRICE. Cup-shaped blooms, with thick petals; clear shell-pink; striped white and red or variegated.

British Queen.

Hybrid Teas or Monthly Roses

Strong 2-year-old, 60c each; \$5.00 per 10; \$45.00 per 100.

This class of Roses for general purposes are preferred by most growers as they have the subtle shading and delicious fragrance of the Teas. In strength of growth, however, they resemble the June roses. They bloom continually all summer long, even into cold weather.

AMERICAN LEGION. This wonderful new rose is named in honor of the World's War heroes. Beautiful, glowing crimson-scarlet color. Large, full, well-shaped flowers sweetly scented. Constant bloomer which is sure to please all who grow it.

ADMIRAL WARD. Deep crimson-red, overlaid black; profuse bloomer. Strong grower with fine, large lustrous foliage.

ANTOINE RIVOIRE. Rosy flesh on yellow ground, shaded with carmine; a splendid variety.

BESSIE BROWN. Creamy white; flowers very large and full; highly perfumed.

BRILLIANT. Described as being the brightest scarlet produced in a rose. Color is intense and fast, not turning to purple.

BRITISH QUEEN. Of the purest ivory white, having the substance of Druschki and the shape of Maman Cochet. Blooms freely and continually.

CARDINAL. Pleasing, fragrant, red rose, robust grower with large blooms.

COLUMBIA. A big, pink, open flower, rose measuring 6 inches across; called a Giant pink everblooming rose.

DAD STERLING. Large blooms of fine form; yellow, with warm, deep pink center; delicate scent; flowers freely.

EDWARD MAWLEY. Velvety crimson with large, thick petals and a high center; carried on good stems.

Los Angeles.

HYBRID TEAS OR MONTHLY ROSES—Con.

FLORENCE FORRESTIER. In bud it is white, tinted yellow, expanding to a beautiful snow white flower; fine fragrance.

GRUSS AN TEPLITZ. Brightest scarlet-crimson; satiny texture; of very free-flowering, vigorous habit.

HELEN GOULD. Large red flowers; free bloomer; strong grower; constantly in bloom.

Ophelia.

HOOSIER BEAUTY. A beautiful velvety red rose, the grandeur and beauty of which no description can give the faintest idea. Strong grower and always in bloom.

IRISH FIREFLAME. Has long, pointed buds, expanding to a large flower of a fiery orange-crimson, yellow shaded, venated and tinted. A wonderful color combination.

KAISERIN AUGUSTA VICTORIA. The greatest white rose in existence; strong, sturdy grower; free bloomer, blooming from early spring till late fall.

Florence Forrestier.

LADY ASHTOWN. Pale yellow rose of great beauty; profuse bloomer of good substance.

LOS ANGELES. The finest pink rose ever introduced. Vigorous grower; always in flower with long-stemmed, luminous, flame-pink colored blooms. In richness of fragrance it surpasses the Marechal Neil.

LADY PLYMOUTH. Rich creamy bud, bordering on yellow; opening to a splendid flower.

LA FRANCE. Bright pink; very large, double and of excellent form; flowers continually through the season.

MRS. AARON WARD. Distinct Indian yellow, with lighter shade on the edges of petals. Free bloomer.

OPHELIA. Opening to a beautiful salmon-flesh, shaded with rose; long buds on long stems. A wonderful rose.

RADIANCE. Beautiful carmine rose, flushed with copper; large, round flowers.

RED RADIANCE. Constantly in bloom from early spring until freezing; extra large; strong, hardy grower; a great favorite.

SUNBURST. Large, fine yellow; long pointed buds, full and double; constant bloomer; good grower and hardy.

BRADLEY'S QUALITY IS KNOWN THE WORLD OVER.

New Hardy Climbing Roses

These Varieties Live Forever, Are Perfectly Hardy, and Will Stand the Winters Anywhere in the United States

NEVER TOO MANY ROSES. When the last word is said of all other flowers; there cannot be too much said of the rose. The plants may be grown either on trellises or pergolas or used in covering banks.

Price, 2-year-old, 50c each; 10 for \$4.50.

AMERICAN BEAUTY (Climbing). A very strong vigorous grower; will grow anywhere. The early fragrant flowers are a deep, rosy carmine-crimson.

AMERICAN PILLAR. A fine shade of pink; with clear white eye; flowers large, often 3 or 4 inches across and produced in great clusters.

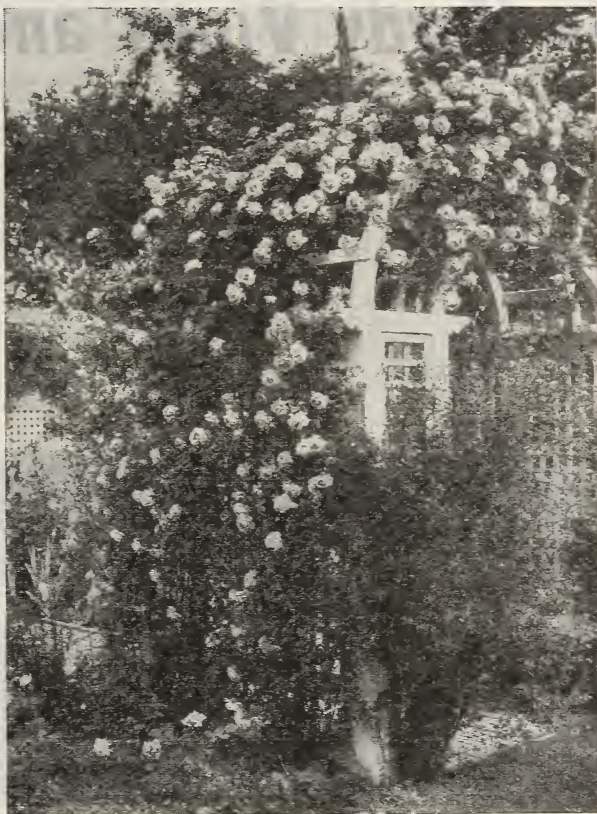

BALTIMORE BELLE. Pale blush, variegated carmine, rose and white; flowers borne in large clusters.

CHRISTINE WRIGHT. Wild rose pink; large and double; vigorous free grower.

CRIMSON RAMBLER. Crimson; a profuse bloomer in large clusters.

DR. W. VAN FLEET. This is indeed a wonderful rose; soft, shell pink; blooms very large, full and high and measure 4 inches in diameter, borne on long sturdy stems. Foliage a fresh green color, gradually changing to a bronzy hue. Extremely hardy.

DOROTHY PERKINS. Soft light pink; flowers profusely in large clusters; very lasting. Strong, rank, hardy grower.

Climbing American Beauty Roses.

EXCELSA (Red Dorothy Perkins). Intense crimson, with lighter edges; fine foliage. Strong rank grower and hardy.

FLOWER OF FAIRFIELD. An ever-blooming variety of Crimson Rambler. Color and habit are identical with that variety, except it is an ever-bloomer.

HIAWATHA. Brilliant scarlet, flowering in large clusters; most brilliant and effective; one of the very finest.

SHOWER OF GOLD. Very fine, coppery gold; pretty buds and very floriferous; glossy foliage.

SILVER MOON. Immense flowers, measuring on an average 4 inches in diameter; semi-double of pure waxy whiteness. Most profuse bloomer of

all climbers; has large dark foliage.

THOUSAND BEAUTIES. Flowers pink, rosy carmine, showing many different shades of coloring. Clusters very large; flowers large.

WHITE DOROTHY PERKINS. Same as Dorothy Perkins except the color is white.

WHITE MEMORIAL. Pure white flowers in pyramidal clusters; beautiful foliage. A splendid rose for growing in the cemetery, allowing it to spread over the ground, or trained to a bush.

THE ILLINOIS ROSE

The Hardest, Prettiest and Most Charming Rose Ever Grown.

This wonderful rose is the only native climbing rose in America. Perfectly hardy in every state, regardless of climate and location. The Illinois rose is an ideal climber to use on porches or trellises, and it can also be kept trimmed into a beautiful hedge. The blossoms are single and borne in abundance in July after other roses are gone. Color most beautiful shade of pink. The stems turn red in winter. There are also clusters of crimson fruits, making an attractive winter decoration. Fine strong plants, 50c each; 3 for \$1.25. Large two-year-old plants, \$1.25 each.

Dorothy Perkins Roses.

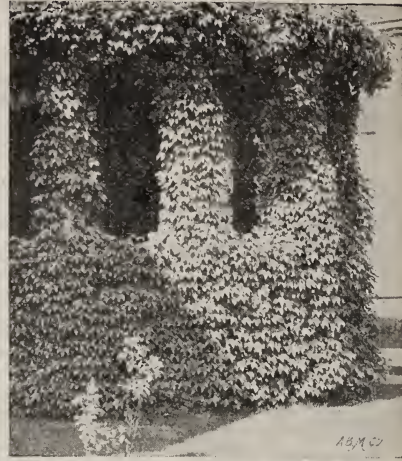

Hardy Vines and Climbers

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to verandas. Hardy vines practically take care of themselves after they are once established and are much more desirable and less trouble than annual or tender varieties.

AMPELOPSIS VEITCHII (Boston Ivy). This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves; quite hardy and very popular. 35c; 3 for \$1.00.

BIGNONIA RADICANS (Trumpet Flower). A grand old favorite, hardy climbing plant, with mammoth trumpet-shaped, scarlet blossoms in August; in bloom all summer. Fine for covering old stumps, verandas or for growing in single specimens. 35c; 3 for \$1.00.

VIRGINIA CREEPER (American Ivy or Woodbine). Fine for trellises where a rapid growing vine is needed; with their scarlet, green and mixed foliage they are very attractive. 35c; 3 for \$1.00.

Ampelopsis Veitchii—Boston Ivy.

DUTCHMAN'S PIPE. An attractive vine of rapid growth. Foliage light green and the yellowish brown flowers are pipe-shaped. 2-year, \$1.00.

Honeysuckle Heckrottii.

Sweet Scented Honeysuckles

HECKROTTII. Flowers open pure white and change to yellow; very fragrant and floriferous; bloom unceasingly all summer; leaves remain green all winter. 40c; 3 for \$1.00.

HALLEANA. Flowers intensely sweet-scented; hardy and almost evergreen. Constant and most profuse bloomer; flowers buff yellow passing to white. 40c; 3 for \$1.00.

RED CORAL. Very rapid grower, producing clusters of scarlet trumpet-shaped flowers in great abundance; very pretty and fragrant. 40c; 3 for \$1.00.

Clematis Paniculata.

Dutchman's Pipe.

Clematis - Virgin's Bower

PANICULATA (Virgin's Bower). A rapid grower and a profuse bloomer; flowers small, white, fragrant, produced in great panicles; very popular. 2-yr., 50c.

JACKMANII. Flowers from 4 to 6 inches in diameter; rich purple, with a velvety appearance; blooms continually from July till frost. 2-yr., 75c; 3-yr., \$1.00.

HENRYI. Blooms white as snow; larger than Jackmanii; a very perfect bloom. 2-yr., 75c; 3-yr., \$1.00.

RAMONA. Flowers very large, light blue and abundant; vigorous grower. 2-yr., 75c.

MAD. ED. ANDRE. Beautiful bright velvety red; very free bloomer. 2-yr., 75c.

CHINESE PURPLE WISTARIA. One of the most elegant and rapid growing of climbing plants. Flowers a beautiful color which bloom in July. 2-yr., 50c.

CHINESE BLUE WISTARIA. The most elegant and rapid growing of all climbing plants, growing 15 to 20 feet in one season. Has long pendulous clusters of pale blue flowers from May till fall. 2-yr., 50c.

CHINESE WHITE WISTARIA. Similar in all respects to Chinese Blue; flowers a pure white. 2-yr., 75c.
